Strategic Entrepreneurial Ecosystems and Business Model Innovation

2022-05-23

strategic entrepreneurial ecosystems and business model innovation is the first collection to focus both on entrepreneurial ecosystems and business model innovation thereby taking a novel and new approach to entrepreneurship and strategic management

International Education Hubs

2013-09-11

education hubs are the newest development in the international higher education landscape countries zones and cities are trying to position themselves as reputed centres for higher education and research but given higher education s current preoccupation with competitiveness branding and economic benefits are education hubs merely a fad a branding exercise or are they an important innovation worthy of serious investment and attention this book tries to answer the question through a systematic and comparative analysis of the rationales actors policies plans and accomplishments for six serious country level education hubs united arab emirates qatar malaysia hong kong singapore and botswana the in depth case studies shows that one size does not fit all a variety of factors drive countries to prepare and position themselves as an education hub they include income generation soft power modernization of domestic tertiary education sector economic competitiveness need for trained work force and most importantly a desire to move towards a knowledge or service based economy in response to these different motivations three different types of education hubs are being developed the student hub talent hub and knowledge innovation hub scholars policy makers professionals students and senior decision makers from education economics geography public policy trade migration will find that this book challenges some assumptions about crossborder education and provides new insights and information

Digital Economy. Emerging Technologies and Business Innovation

2020-12-02

this book constitutes the refereed proceedings of the 5th international conference icdec 2020 held in bucharest romania in june 2020 due to the covid 19 pandemic the conference took place virtually the 13 full papers presented in this volume together with 3 abstracts of keynotes and 1 introductory paper by the

steering committee were carefully reviewed and selected from a total of 41 submissions the core theme of this year's conference was emerging technologies business innovation the papers were organized in four topical sections named digital transformation data analytics digital marketing and digital business models

Regional Innovation Evolution

2022-06-15

this book covers many aspects of innovation theory evolutionary economics economic geography and simulation models it is one of the first books to comprehensively and systematically focus on the evolution of regional innovation based on provincial experience in emerging economics including stylized facts theoretical explanation and simulation the book is devoted to a pioneering process based regional innovation matrix used for classifying a regional innovation model which is illustrated by real world cases and data analyses the topics addressed here include path dependency lock in routines variations selectivity regional gap innovation progress agglomeration and innovation efficiency the simulation methods describing the dynamics of regional innovation evaluation on economics are developed as well the primary objective of this work is to provide a tractable and useful regional governance tool for researchers and policy makers in regional science human geography and related disciplines the book is highly recommended to readers who seek more insight into the continuous development of china or regional development gaps

Conceptual Modeling for New Information Systems Technologies

2003-08-06

the objective of the workshops associated with er 2001 the 20th international conference on conceptual modeling was to give participants the opportunity to present and discuss emerging hot topics thus adding new perspectives to conceptual modeling this the 20th er conference the first of the 21st century was also the first one in japan the conference was held on november 27 30 2001 at yokohama national university with 192 participants from 31 countries er 2001 encompasses the entire spectrum of conceptual modeling from theoretical aspects to implementations including fundamentals applications and software engineering in particular er 2001 emphasized e business and reengineering to meet this objective we selected the following four topics and planned four international workshops international workshop on conceptual modeling of human organizational social aspects of manufacturing activities humacs 2001 manufacturing enterprises have to confront a host of demands the competitive climate enhanced by communication and

knowledge sharing will require increasingly rapid responses to market forces customer demands for higher quality better services and lower cost will force manufacturers to reach new levels of flexibility and adaptability sophisticated customers will demand products customized to meet their needs industries have so far sought to cope with these challenges primarily through advances in traditional capital by installing more powerful hardware and software technology attention to the role of humans combined with organizational and social schemes in manufacturing has only been marginal the workshop humacs 2001 aimed to challenge the relevance of this last point

Is the European Union Capable of Integrating Diverse Models of Capitalism?

2021-03-31

the 2009 european sovereign debt crisis and the eu's policy response to it have prompted scholars to re-think whether diverse national models of capitalism can thrive within the european union eu are some national economic systems better suited to adapt to european integration than others and if so why contributions within this volume provide a qualified yes to these questions raised concluding that the eu favors export led growth models while it penalizes and discourages domestic consumption oriented growth paths particularly those that are financed by debt accumulation the book questions whether the eu is capable of integrating these diverse capitalist regimes this volume adds a comparative capitalism perspective to eu integration scholarship in order to demonstrate that ever closer union is not capable of accommodating diversity in national economic institutions chapters in this volume provide an innovative framework for understanding what factors related to european integration impede the economic and political integration of diverse european market economies while recent comparative capitalism literature highlights that european monetary integration has favored export led growth regimes contributions in this volume outline that the eu's prioritization of export led growth over domestic demand led growth is present in other facets of integration including eu accession financial integration the free movement of people fiscal governance and the europe 2020 growth strategy the chapters in this book were originally published as a special issue of new political economy

Proceeding of the International Science and Technology Conference

"FarEastCon 2020"

2021-06-06

this book presents the proceedings of the international science and technology conference fareastcon 2020 which took place on october 6 9 2020 in vladivostok russian federation the conference provided a platform for gathering expert opinions on projects and initiatives aimed at the implementation of far sighted scientific research and development and allowed current theoretical and practical advances to be shared with the broader research community featuring selected papers from the conference this book is of interest to experts in various fields whose work involves developing innovative solutions and increasing the efficiency of economic activities

Dominant Divisions of Labor: Models of Production That Have Transformed the World of Work

2013-11-27

the past century of labor was definitively captured by theories like fordism and taylorism or scientific management but how do we make sense of global production today this short book takes a panoramic view of the candidates for the most succinct theory of the 21st century division of labor including post fordism flexible accumulation mcdonaldization waltonism nikeification gatesism and siliconism shareholder value and lean production and toyotism authors thomas janoski and darina lepadatu argue that lean production in a somewhat expanded version presents three variations toyotism the strongest form nikeification a moderate form with off shored plants lacking teamwork and waltonism the merchandising form that presses for off shoring while all three share strong elements of just in time jit production and supply chain management they differ in how teamwork and long term philosophies are valued this critical review of dominant established theories serves to inform subsequent research on the contemporary international division of labor

Global Nomads

2024-02-02

did you know that over 50 of millennials are more likely to start a business than any previous generation

global nomads the rise of borderless startups is your gateway to join this revolution this isn't just a book it's a journey across continents diving into the world of startups without borders for the ambitious globally minded and innovative aspiring entrepreneur each chapter is a treasure trove of strategies stories and secrets you'll explore the digital nomad lifestyle that's rewriting entrepreneurship and delve into how technology is erasing business boundaries imagine the thrill of leading a remote team from a beach in Bali or closing deals while traversing the Sahara but it's not just about the allure of remote work this book tackles the real challenges from navigating cultural nuances to legal landscapes across different continents you'll find inspirational success stories from the Middle East and Africa offering lessons in resilience and adaptability business students prepare to have your minds expanded this book is a crash course in global business practices tech innovations and cultural agility each page turns the complex world of international startups into engaging digestible bites of knowledge and guess what it's laced with humor because who said learning about global startups can't be fun by the end of Global Nomads you won't just understand the rise of borderless startups you'll be equipped to join them your perspective on global entrepreneurship will be forever changed are you ready to break free from traditional boundaries and make your mark in the global business landscape your journey starts here

Middle Tech

2024-05-21

Why software isn't perfect as seen through the stories of software developers at a run-of-the-mill tech company contrary to much of the popular discourse not all technology is seamless and awesome some of it is simply good enough in Middle Tech Paula Bialski offers an ethnographic study of software developers at a non-flashy non-start-up corporate tech company their stories reveal why software isn't perfect and how developers communicate care and compromise to make software work or at least work until the next update exploring the culture of good enoughness at a technology firm she calls MiddleTech Bialski shows how doing good enough work is a collectively negotiated resistance to the organizational ideology found in corporate software settings the truth Bialski reminds us is that technology breaks due to human-related issues staff cutbacks cause media platforms to crash in car GPS systems cause catastrophic incidents and chatbots can be weird developers must often labor to patch and repair legacy systems rather than dream up killer apps Bialski presents a less sensationalist more empirical portrait of technology work than the frequently told Silicon Valley narratives of disruption and innovation she finds that software engineers at MiddleTech regard technology as an ephemeral object that only needs to be good enough to function until its next iteration as a result they don't feel much pressure to make it perfect through the deeply personal stories of people and their practices at MiddleTech Bialski traces the ways that workers create and sustain a

complex culture of good enoughness

Information Technology and Systems

2020-08-25

drawing on ten years of empirical work and research analyses of how open development has played out in practice a decade ago a significant trend toward openness emerged in international development open development can describe initiatives as disparate as open government open health data open science open education and open innovation the theory was that open systems related to data science and innovation would enable more inclusive processes of human development this volume drawing on ten years of empirical work and research analyzes how open development has played out in practice focusing on development practices in the global south the contributors explore the crucial questions of who is allowed to participate when an initiative is open and who benefits or not from them finding that processes characterized as open can sometimes be exclusionary in their implementation examining a wide range of cases they consider the governance of open development ecosystems and the implementation of a variety of applications including open educational resources collaborative science and the uses of crowdsourcing contributors denisse albornoz chris armstrong savita bailur roxana barrantes carla bonina michael cañares leslie chan laura czerniewicz jeremy de beer stefano de sabbata shirin elahi alison gillwald mark graham rebecca hillyer cheryl hodgkinson williams dick kawooya erika kramer mbula paulo matos caroline ncube chidi oguamanam angela okune alejandro posada nagla rizk isaac rutenberg tobias schonwetter fabrizio scrollini ruhiya kristine seaward raed sharif matthew smith william randall spence henry trotter françois van schalkwyk sonal zavaeri

Making Open Development Inclusive

2013

this book explores startups that have thrived against the odds in places where startup success was deemed to be unlikely discussing a number of technology startups from around the world that have succeeded without state backing nor local venture and seed capital black swan start ups provides unique insights into unsung models of success beyond the two dominant narratives of asia s tiger economies and america s silicon valley miracle the author describes these stories of success as black swan events and ascribes their achievements to the ability of entrepreneurs to leverage the place surplus of their locations while building connections to support networks outside their immediate geographies including case studies such

as skype in estonia soundcloud in germany and bayt com in dubai this insightful book gives a holistic and wide ranging view of how technology startups have and can succeed in less likely places

Energy and Water Development Appropriations for 2014

2016-05-11

offering invaluable insights into technologically driven change in africa this incisive book envisions myriad positive economic changes brought about by new technologies and innovations rooted in original research from contributors who have worked and taught in africa it encapsulates developments and breakthroughs throughout the continent

Black Swan Start-ups

2023-10-06

this handbook provides the most comprehensive examination of asian cities developed and developing large and small and their urban development investigating the urban challenges and opportunities of cities from every nation in asia the handbook engages not only the global cities like shanghai tokyo singapore seoul and mumbai but also less studied cities like dili malé bandar seri begawan kabul and pyongyang the handbook discusses asian cities in alignment to the united nations new urban agenda and sustainable development goals in order to contribute to global policy debates in doing so it critically reflects on the development trajectories of asian cities and imagines an urban future in asia and the world in the post sustainable post global and post pandemic era presenting 43 chapters of original insightful research this book will be of interest to scholars practitioners students and general readers in the fields of urban development urban policy and planning urban studies and asian studies

Technological Leapfrogging and Innovation in Africa

2023-05-31

don't identify with the mainstream startup world working on a startup outside of a tech hub or in an unfashionable industry maybe that makes you an underdog entrepreneur this book is for you startups and community organizers outside of the mainstream are being misled this book is inspired by experience co-founding a startup accelerator and working with startups around the world startup sacrilege includes

lessons learned and solutions especially for startups and community organizers outside of established tech hubs it s an alternative view that challenges startup world assumptions and makes suggestions for what to do instead

Routledge Handbook of Asian Cities

2012-03-15

volume is indexed by thomson reuters cpci s was these are the proceedings of the international conference on advanced manufacturing technology and systems amts 2012 held on the 17th april 2012 in wuhan china they cover the most recent developments in advanced manufacturing technology and systems

Startup Sacrilege for the Underdog Entrepreneur

2024-02-02

this working paper inaugurates the technology fundamentals for digital finance series concentrating on the technical aspects of financial digital assets the series aims to facilitate the use of a clear terminology in a nascent platform oriented paradigm of financial infrastructures by laying the groundwork for technical discussions on digital asset standards the paper introduces a conceptual model named asap access service asset platform for digital asset platforms dap leveraging insights from it industry practices and experiments by central banks the asap model is illustrated through examples and use cases of tokenized assets to demonstrate the possible usage and merits of modeling digital asset platforms with four layers just as the utilization of a seven layer model often refered to as tcp ip has been fundamental to the interoperability of the internet it is anticipated that the four layer asap model for digital asset platforms will similarly promote cross platform interoperability including across various jurisdictions paving the way for a more cohesive digital asset ecosystem

ASAP: A Conceptual Model for Digital Asset Platforms

1974

this book consolidates under one roof the latest research investigating the various technological advances and new managerial approaches driving innovation within wine tourism competition in wine tourism intensifies at a global scale while wine tourism demand continuously evolves diversifies and becomes more sophisticated the book highlights that innovation and technology exploitation have become not only a way to differentiate but also a survival necessity for wine tourism operators and wine destinations alike this book includes cutting edge research about the latest technological developments and advances that revolutionise the wine tourism sector and transform the way wine tourism experiences are designed and delivered in addition the book includes case studies and research findings showing how wine tourism operators and destinations can nurture support and implement innovation at various levels including the experience the process the business model and or the ecosystem level

The Need for a High-Accuracy, Open-Access Global Digital Elevation Model

2023-01-04

sustainable seaweed technologies cultivation biorefinery and applications collates key background information on efficient cultivation and biorefinery of seaweeds combining underlying chemistry and methodology with industry experience beginning with a review of the opportunities for seaweed biorefinery and the varied components and properties of macroalgae the book then reviews all the key steps needed for industrial applications from its cultivation collection and processing to extraction techniques concentration and purification a range of important applications are then discussed including the production of energy and novel materials from seaweed before a set of illustrative case studies shows how these various stages work in practice drawing on the expert knowledge of a global team of editors and authors this book is a practical resource for both researchers and businesses who currently work with macroalgae highlights the specific challenges and benefits of developing seaweed for sustainable products

presents useful case studies that demonstrate varied approaches and methodologies in practice covers the complete seaweed chain from cultivation to waste management

NASA Technical Memorandum

2020-05-20

this volume debates issues critical for the construction of a viable united states of africa in this century contributors to this book contend that such a unification scheme would provide african leaders and citizens a vast home within which to exploit its abundant natural resources for socio economic development and enhancement of its political clout in global affairs

Technology Advances and Innovation in Wine Tourism

2015-02-10

the traditional structures of business and the workplace have changed drastically in recent years in response companies have continuously worked to improve their ability to generate new ideas and bring them to market by removing the common constraints on the processes of innovation this movement of open innovation in the workforce necessitates improvements in the arenas of idea generation evaluation funding and the presentation of these ideas to the marketplace in new and exciting ways edited by arthur b markman open innovation academic and practical perspectives on the journey from idea to market brings together the latest scholarship on these elements with tried and true stories of successful applications in real world settings authors explore a variety of new methods for improving idea development and processes making this book an invaluable resource for readers as they learn how to create a supportive ecosystem for their employees and co workers

Sustainable Seaweed Technologies

2016

this book constitutes the refereed proceedings of the 21st ifip wg 5.5 working conference on virtual enterprises pro ve 2020 held in valencia spain in november 2020 the conference was held virtually the 53 full papers were carefully reviewed and selected from 135 submissions they provide a comprehensive overview of major challenges and recent advances in various domains related to the digital transformation

and collaborative networks and their applications with a strong focus on the following areas related to the main theme of the conference collaborative business ecosystems collaborative business models collaboration platform data and knowledge services blockchain and knowledge graphs maintenance compliance and liability digital transformation skills for organizations of the future collaboration in open innovation collaboration in supply chain simulation and analysis in collaborative systems product and service systems collaboration impacts boosting sustainability through collaboration in agri food 4 0 digital innovation hubs for digitalizing european industry and collaborative networks for health and wellness data management

asking how alternative are alternative marketscapes volume 29 of advances in the study of entrepreneurship innovation and economic growth provides entrepreneurs and companies a concise understanding of alternative marketscapes through theoretical arguments and case studies paving the way for development and success

Reimagining Reference in the 21st Century

2022-08-23

these proceedings address the latest developments in information communication and technologies for geo engineering the 3rd international conference on information technology in geo engineering igitg 2019 held in guimarães portugal follows the previous successful installments of this conference series in durham 2014 and shanghai 2010 the respective chapters cover the following use of information and communications technologies big data and databases data mining and data science imaging technologies building information modelling applied to geo structures artificial intelligence smart geomaterials and intelligent construction sensors and monitoring asset management case studies on design construction and maintenance given its broad range of coverage the book will benefit students educators researchers and professional practitioners alike encouraging these readers to help take the geo engineering community into the digital age

Product Development and Management Body of Knowledge

2018

this book delves into the practical applications of vector search in elastic and embodies a broader philosophy it underscores the importance of search in the age of generative ai and large language models this narrative goes beyond the how to address the why highlighting our belief in the transformative power of search and our dedication to pushing boundaries to meet and exceed customer expectations shay banon founder cto at elastic key features install configure and optimize the chatgpt elasticsearch plugin with a focus on vector data learn how to load transformer models generate vectors and implement vector search with elastic develop a practical understanding of vector search including a review of current vector databases purchase of the print or kindle book includes a free pdf ebook book description while natural language processing nlp is largely used in search use cases this book aims to inspire you to start using vectors to overcome equally important domain challenges like observability and cybersecurity the chapters focus mainly on integrating vector search with elastic to enhance not only their search but also observability and cybersecurity capabilities the book which also features a foreword written by the founder of elastic begins by teaching you about nlp and the functionality of elastic in nlp processes here you ll delve into resource requirements and find out how vectors are stored in the dense vector type along with specific page cache requirements for fast response times as you advance you ll discover various tuning techniques and strategies to improve machine learning model deployment including node scaling

configuration tuning and load testing with rally and python you ll also cover techniques for vector search with images fine tuning models for improved performance and the use of clip models for image similarity search in elasticsearch finally you ll explore retrieval augmented generation rag and learn to integrate chatgpt with elasticsearch to leverage vectorized data elser s capabilities and rrf s refined search mechanism by the end of this nlp book you ll have all the necessary skills needed to implement and optimize vector search in your projects with elastic what you will learn optimize performance by harnessing the capabilities of vector search explore image vector search and its applications detect and mask personally identifiable information implement log prediction for next generation observability use vector based bot detection for cybersecurity visualize the vector space and explore search next with elastic implement a rag enhanced application using streamlit who this book is for if you re a data professional with experience in elastic observability search or cybersecurity and are looking to expand your knowledge of vector search this book is for you this book provides practical knowledge useful for search application owners product managers observability platform owners and security operations center professionals experience in python using machine learning models and data management will help you get the most out of this book
