this story is based on a fable from one of the world s ancient works of literature the mahabharat it is a fascinating tale about two brothers who constantly bicker over trivial matters one day amid a heated argument they curse each other to become a turtle and an elephant much to their surprise their curses come true and they find themselves in a forest unable to communicate as the story progresses we witness the consequences of hostility among family members the story beautifully depicts how being hateful towards each other only leads to isolation and despair this story showcases how life threatening situations can bring even the worst of enemies together it reminds us of the significance of being grateful for and cherishing what we have in life the brothers who were once at odds learn to appreciate each other s company and support in the face of adversity it is a poignant reminder of the power of forgiveness and the importance of family bonds

why have elephants and our preconceptions about them been central to so much of human thought from prehistoric cave drawings in europe and ancient rock art in africa and india to burning pyres of confiscated tusks our thoughts about elephants tell a story of human history in elephant trails nigel rothfels argues that over millennia we have made elephants into both monsters and miracles as ways to understand them but also as ways to understand ourselves drawing on a broad range of sources including municipal documents zoo records museum collections and encounters with people who have lived with elephants rothfels seeks out the origins of our contemporary ideas about an animal that has been central to so much of human thought he explains how notions that have been associated with elephants for centuries that they are exceptionally wise deeply emotional and have a special understanding of death that they never forget are beloved of the gods and suffer unusually in captivity and even that they are afraid of mice all tell part of the story of these amazing beings exploring the history of a skull in a museum a photograph of an elephant walking through the american south in the early twentieth century the debate about the quality of life of a famous elephant in a zoo and the accounts of elephant hunters rothfels demonstrates that elephants are not what we think they are and they never have been elephant trails is a compelling portrait of what the author terms our elephant

Burmese Days is George Orwell's first novel originally published in 1934 set in British Burma during the waning days of the British Empire when Burma was ruled from Delhi as part of British India. The novel serves as a portrait of the dark side of the British Raj. At the center of the novel is John Flory, trapped within a bigger system that is undermining the better side of human nature. The novel deals with indigenous corruption and imperial bigotry in a society where native peoples were viewed as interesting but ultimately inferior. Includes a bibliography and brief bio of the author.
