## central tendency wikipedia

Jan 27 2024

in statistics a central tendency or measure of central tendency is a central or typical value for a probability distribution 1 colloquially measures of central tendency are often called averages the term central tendency dates from the late 1920s

## measures of central tendency definition examples

Dec 26 2023

a measure of central tendency is a single value that represents the center point of a dataset this value can also be referred to as the central location of a dataset in statistics there are three common measures of central tendency the mean the median the mode

## **central tendency definition measures of central tendency**

Mar 17 2023

central tendency is a statistic that represents the single value of the entire population or a dataset some of the important examples of central tendency include mode median arithmetic mean and geometric mean etc

## **measures of central tendency formula meaning examples**

Feb 16 2023

the central tendency is defined as the statistical measure that can be used to represent the entire distribution of a

dataset using a single value called a measure of central tendency any of the measures of central tendency provides an accurate description of the entire data in the distribution measures of central tendency example
