**A Spectrum of Solutions for Clients with Autism** 2020-07-29 this book is the result of the first two year work of working group 1 of the network ludi play for children with disabilities ludi is an action 2014 2018 financed by cost it is a multidisciplinary network of more than 30 countries and almost 100 researchers and practitioners belonging to the humanistic and technological fields to study the topic of play for children with disabilities within the framework of the international

classification of functioning disability and health who 2001 the principal objective of this book is to bring the ludi contribution to the important topic of play in children with disabilities because today an international consensus on the definition of play and disabilities is still lacking the process of ensuring equity in the exercise of the right to play for children with disabilities requests three actions to approach this topic through a common language at least all over europe to put play at the centre of the multidisciplinary research and intervention regarding the children with disabilities to grant this topic the status of a scientific and social theme of full visibility and recognized authority children with disabilities face several limitations in play due to several reasons impairments playgrounds toys and other play tools that are not accessible and usable environments and contexts that are not accessible nor inclusive lack of educational awareness and intentionality lack of specific psycho pedagogical and rehabilitative competence lack of effective intervention methodologies moreover disabled children s lives are dominated by medical and rehabilitative practices in which play is always an activity aiming to reach an objective or to provoke an improvement play for the sake of play is considered a waste of time the concept of play for the sake of play strongly refers to the distinction between play activities and play like activities play activities are initiated and carried out by the player alone with peers with adults etc for the only purpose of play itself fun and joy interest and challenge love of race and competition ilinx and

dizziness etc they have of course consequences on growth and development but these consequences are not intentionally pursued play like activities are initiated and conducted by an adult with one or more children in educational clinical social contexts they are playful and pleasant but their main objective is other than play e g cognitive learning social learning functional rehabilitation child s observation and assessment psychological support psychotherapy etc this book then contributes to a clear distinction between play and play like activities that hopefully will bring to new developments in play studies
