They Left Great Marks on Me 2012-03-12 since the end of the cold war the idea of human rights has been made into a justification for intervention by the world's leading economic and military powers above all the united states in countries that are vulnerable to their attacks the criteria for such intervention have become more arbitrary and self-serving and their form more destructive from yugoslavia to afghanistan to iraq until the u.s. invasion of iraq the large parts of the left was often complicit in this ideology of intervention discovering new hitlers as the need arose and denouncing antiwar arguments as appeasement on the model of munich in 1938 jean bricmont's humanitarian imperialism is both a historical account of this development and a powerful political and moral critique it seeks to restore the critique of imperialism to its rightful place in the defense of human rights it describes the leading role of the united states in initiating military and other interventions but also on the obvious support given to it by european powers and nato it outlines an alternative approach to the question of human rights based on the genuine recognition of the equal rights of people in poor and wealthy countries timely topical and rigorously argued jean bricmont's book establishes a firm basis for resistance to global war with no end in sight
