american fathers are a highly diverse group but the breadwinning live in biological dad prevails as the fatherhood ideal consequently policymakers continue to emphasize marriage and residency over initiatives that might help foster healthy father child relationships and creative co parenting regardless of marital or residential status in

nurturing dads william marsiglio and kevin roy explore the ways new initiatives can address the social cultural and economic challenges men face in contemporary families and foster more meaningful engagement between many different kinds of fathers and their children what makes a good father the firsthand accounts in nurturing dads show that the answer to this question varies widely and in ways that counter the mainstream provide and reside model of fatherhood marsiglio and roy document the personal experiences of more than 300 men from a wide range of socioeconomic backgrounds and diverse settings including fathers to be young adult fathers middle class dads stepfathers men with multiple children in separate families and fathers in correctional facilities they find that most dads express the desire to have strong close relationships with their children and to develop the nurturing skills to maintain these bonds but they also find that disadvantaged fathers including young dads and those in constrained financial and personal circumstances confront myriad structural obstacles such as poverty inadequate education and poor job opportunities nurturing dads asserts that society should help fathers become more committed and attentive caregivers and that federal and state agencies work sites grassroots advocacy groups and the media all have roles to play recent efforts to introduce state initiated paternity leave should be coupled with social programs that encourage fathers to develop unconditional commitments to children to co parent with mothers to establish partnerships with their children s other caregivers and to develop parenting skills and resources before becoming fathers via activities like volunteering and mentoring kids ultimately marsiglio and roy argue such combined strategies would not only change the policy landscape to promote engaged fathering but also change the cultural landscape to view nurturance as a fundamental aspect of good fathering care is a human experience not just a woman s responsibility and this core idea behind nurturing dads holds important implications for how society supports its families and defines manhood the book promotes the progressive notion that fathers should provide more than financial support and in the process bring about a better start in life for their children a volume in the american sociological association s rose series in sociology

PATHWAYS OF POTENTIAL

2019

nurturing our humanity offers a new perspective on our personal and social options in today's world showing how we can build societies that support our great human capacities for consciousness caring and creativity it brings together findings largely overlooked from the natural and social sciences debunking the popular idea that we are hard wired for selfishness war rape and greed its groundbreaking new approach reveals connections between disturbing trends like climate change denial and regressions to strongman rule moving past right vs left religious vs secular eastern vs western and other familiar categories that do not include our formative parent child and

gender relations it looks at where societies fall on the partnership domination scale on one end is the domination system that ranks man over man man over woman race over race and man over nature on the other end is the more peaceful egalitarian gender balanced and sustainable partnership system nurturing our humanity explores how behaviors values and socio economic institutions develop differently in these two environments documents how this impacts nothing less than how our brains develop examines cultures from this new perspective including societies that for millennia oriented toward partnership and proposes actions supporting the contemporary movement in this more life sustaining and enhancing direction it shows how through today s ever more fearful frenzied and greed driven technologies of destruction and exploitation the domination system may lead us to an evolutionary dead end a more equitable and sustainable way of life is biologically possible and culturally attainable we can change our course

unique in ethnography nurturing doubt documents the transforming effects of field experiences on a young mennonite who went to argentina to work with the toba first as a missionary and later as an anthropologist elmer miller insightfully probes the documents diaries field journals and letters of both his lives revealing as he does the ways in which his perceptions of the toba and theirs of him changed when his role changed deeply affected by an upbringing in which he had been taught that doubting was sinful miller gradually found that he doubted not only the validity of the missionary mandate but also his ethnographic mandate and the whole practice of anthropology his exploration of how his doubt was transformed from a negative activity into a positive philosophical attitude underscores the richness of his relationships with the toba in depicting the move from theological to

anthropological discourse miller contributes to current debates over the form and purpose of ethnographic investigation and reporting
