Antitrust between EU law and national law / Antitrust fra diritto nazionale e diritto dell'Unione Europea

2013-02-22

this work contains the papers of the tenth conference on antitrust between eu law and national law held in treviso on may 17 and 18 2012 under the patronage of the european lawyers union union des avocats européens uae the associazione italiana per la tutela della concorrenza the italian section of the ligue internationale du droit de la concurrence lidc the associazione italiana giuristi di impresa aigi the european company lawyers association ecla and the associazione antitrust italiana aai some of the papers have been extensively reviewed and updated by the authors prior to publication contributions contained in this volume are the result of an in depth analysis and study of the most salient issues arising from the application of antitrust rules carried out by experienced and high ranking professionals company lawyers academics and eu national institutional representatives who attended the conference they deal with extremely topical issues lying at the heart of current antitrust debate some of the most contemporary topics include those relative to the large scale distribution sector and the control of concentrations at both national and european level ample consideration is also given to salient antitrust issues encountered in undertakings day to day business life as well as to the future of antitrust in the global economy also in the light of the new powers recently attributed to the italian antitrust authority to challenge administrative acts this volume also includes some precious insights on the assessment and quantification of damages in antitrust infringements from both an economic and legal perspective as well as reflections on the role of judges in the application of antitrust law also following the principles set forth by the european court of human rights in the well known menarini case

In the Company of Many Good Poets. Collected Papers of Franco Montanari

2023-10-24

volume i of franco montanari s kleine schriften comprises some 66 papers on ancient scholarship a topic which he decisively helped establishing as an extremely important field of study they include general surveys of alexandrian and pergamene philology major contributions to ancient homeric scholarship with a particular emphasis on aristarchus ancient scholarship on hesiod and aeschylus as well as an important number of editions and notes on papyrological scholarly texts volume ii consists of 42 contributions to homer s iliad and odyssey pindar aeschylus herodotus euripides the athenaion politeia lucian nonnus philosophical papyri the reception of antiquity and portraits of contemporary scholars

20th Century Physics

1998

in this important volume major events and personalities of 20th century physics are portrayed through recollections and historiographical works of one of the most prominent figures of european science a former student of enrico fermi and a leading personality of physical research and science policy in postwar italy edoardo amaldi devoted part of his career to documenting both as witness and as historian some significant moments of 20th century science the focus of the book is on the european scene ranging from nuclear research in rome in the 1930s to particle physics at cern and includes biographies of physicists such as ettore majorana bruno touschek and fritz houtermans edoardo amaldi carpaneto 1908 roma 1989 was one of the leading figures in twentieth century italian science he was conferred his

degree in physics at rome university in 1929 and played an active role as a member of the team of young physicists known as the boys of via panisperna in the fundamental research on artificial induced radioactivity and the properties of neutrons which won the group's leader enrico fermi the nobel prize for physics in 1938 following fermi's departure for the united states in 1938 and the disruption of the original group amaldi took upon himself the task of reorganising the research in physics in the difficult situation of post war italy his own research went from nuclear physics to cosmic ray physics elementary particles and in later years gravitational waves active research was for him always coupled to a direct involvement as a statesman of science and an organiser he was the leading figure in the establishment of infn national institute for nuclear physics and has played a major role as spokesman of the italian scientific community in the creation of cern the large european laboratory for high energy physics he also actively supported the formation of a similar trans national joint venture in space science which gave birth to the european space agency in these and several other scientific organisations he was often entrusted with directive responsibilities in his later years he developed a keen interest in the history of his discipline this gave rise to a rich production of historiographic material of which a significant sample is collected in this volume

2004

the 74th volume of the eranos yearbooks the age of immediacy at the test of meaning presents to the public the work of the last two years of activities at the eranos foundation 2017 2018 the book gathers the lectures presented at the occasion of the 2017 eranos conference where is the world going the uncertain future between traditional knowledge and scientific thought the 2018 eranos conference space for thinking and thinking about space reflections on the relations between the soul and places at the time of the anthropocene the 2017 eranos jung lectures who is afraid of interiority a journey through literature philosophy and psychology the 2018 eranos jung lectures who is stealing our time the age of immediacy at the test of meaning and the 2018 eranos school seminar the mechanisms of heresy old and new forms of exclusion and repression the volume includes essays by valery afanassiev stephen aizenstat arnaldo benini paul bishop roberto casati adriano fabris franco ferrari giuseppe o longo jaap mansfeld panos mantziaras grazia shōgen marchianò massimo mori guy pelletier antonio prete francesca rigotti rené roux silvano tagliagambe yannis tsiomis amelia valtolina matteo vegetti antonio vitolo samaneh yasaei and chiara zamboni

Eranos Yearbook 74 - The Age of Immediacy at the Test of Meaning

2006-04-11

high mountains can be considered as particularly appropriate environments to detect effects of climate change on natural biocoenoses in a global scale for the following reasons firstly ecosystems at the temperature limits of plant life are generally thought to be especially sensitive to climate change 1 2 3 an already ongoing upward shift of vascular plants at high summits in the alps determined by the austrian igbp research 4 5 6 7 8 is most likely a response to the atmospheric warming since the 19th century secondly high mountains still comprise the most natural ecosystems in many countries being largely untouched by human settlements and agricultural influences therefore climatic effects on ecosystems can be studied without masking effects from human land use thirdly high mountain ranges are present in virtually every major zoniobiome of the earth the research initiative gloria aims to establish an urgently needed global monitoring network by using high mountain ecosystems as sensitive indicators as required in the igbp mountain workplan 9 moreover a deeper understanding of assemblage mechanisms and assemblage processes in vegetation patterns as a contribution to ecological theory can be expected this paper gives a short general overview about gloria and a first outline about the concept method and some few results of the multi summit approach one of the basic intentions within the proposed network it aims to encourage the involvement of high mountain researchers and research coordinators in a detailed discussion of the proposed research activities and in a co operation within the planned global

monitoring network

Global Change and Protected Areas

2010

this volume explores the potential of employing a relational paradigm for the purposes of interdisciplinary exchange bringing together scholars from the social sciences philosophy and theology it seeks to bridge the gap between subject areas by focusing on real phenomena although these phenomena are studied by different disciplines the editors demonstrate that it is also possible to study them from a common relational perspective that connects the different languages theories and perspectives which characterize each discipline by going beyond their differences to the core of reality itself as an experimental collection that highlights the potential that exists for cross disciplinary work this volume will appeal to scholars across a range of field concerned with critical realist approaches to research collaborative work across subjects and the manner in which disciplines can offer one another new insights

Changing Landscapes

2019-04-09

economic values are increasingly used in policy analysis and legal settings with the growing recognition that many of the things that benefit or harm people are outside the market system have come increasing efforts to develop nonmarket valuation techniques one such technique is the contingent valuation method cvm cvm seeks to value environmental and other nonmarket goods and services by asking individuals about their values using survey methods these procedures are different from the revealed preference methods that economists have historically employed to estimate economic values why depart from well established revealed preference procedures and apply a stated preference method like cvm for nonmarket goods and services revealed preference methods have two shortcomings that those applying cvm hope to avoid first revealed preference methods involve econometric problems that have yet to be fully overcome the second shortcoming of revealed preference methods is that such methods when applied to environmental amenities are likely to be only partial measures of value given the tremendous interest that exists in economic values and the limitations of revealed preference methods it is not surprising that interest in cvm has grown rapidly environmental resource valuation reviews the application of cvm and compares american experiences in nonmarket evaluation with those in other countries

Social Science, Philosophy and Theology in Dialogue

2012-12-06

as a genre situated at the crossroad of rhetoric and fiction declamatio offers the freedom to experiment with new forms of discourse placing the literariness of ps quintilian s oeuvre into the spotlight this volume showcases declamation as a realm of genuine literary creation with its own theoretical underpinning literary technique and generic conventions it is of interest to students and scholars of rhetoric and roman literature

Environmental Resource Valuation

2016-01-01

il volume esamina i rapporti di lavoro non contrattuali schiavitù e servaggio che a lungo contraddistinsero l'economia europea sia pure con andamenti assai diversi nelle differenti aree i saggi in esso contenuti esaminano la evoluzione del servaggio visto come il lato economico del regime signorile e delle diverse forme di sottomissione personale fino alla vera e propria tratta degli schiavi di cui i mercanti europei furono protagonisti mettendo in luce una situazione assai più complessa e articolata di quanto gli schemi interpretativi tradizionali lasciassero intuire

2014

african authors have consistently returned to childhood to find their personal as well as their racial roots far from being merely nostalgic yearnings for a lost paradise many of the treatments of childhood as shown in articles in this issue have exposed a grim reality of cruelty harshness parental particularly paternal egocentrism and extraordinary bruising of the vulnerable child psyche camara laye may have portrayed a paradise state but yvonne vera has treated one of the cruelest features of childhood anywhere african authors generally have been sternly responsible in their portrayal of childhood publisher s description

Childhood in African Literature

2015-03-01

this book proposes a radically evolutionary approach to biolinguistics that consists in considering human language as a form of species specific intelligence entirely embodied in the corporeal structures of homo sapiens the book starts with a historical reconstruction of two opposing biolinguistic models the chomskian biolinguistic model cbm and the darwinian biolinguistic model dbm the second part compares the two models and develops into a complete reconsideration of the traditional biolinguistic issues in an evolutionary perspective highlighting their potential influence on the paradigm of biologically oriented cognitive science the third part formulates the philosophical evolutionary and experimental basis of an extended theory of linguistic performativity within a naturalistic perspective of pragmatics of verbal language the book proposes a model in which the continuity between human and non human primates is linked to the gradual development of the articulatory and neurocerebral structures and to a kind of prelinguistic pragmatics which characterizes the common nature of social learning in contrast grammatical semantic and pragmatic skills that mark the learning of historical natural languages are seen as a rapid acceleration of cultural evolution the book makes clear that this acceleration will not necessarily favour the long term adaptations for homo sapiens

advances in molecular spectroscopy volume 3 provides information pertinent to the fundamental aspects of inorganic molecules and complexes this book covers a

variety of topics including infrared spectrum polyatomic ions infrared emissions and raman spectra organized into five parts encompassing 72 chapters this volume begins with an overview of the infrared spectrum of pyridine this text then examines the results from studies of the infrared and raman spectra of N_2O_4 in the solid and liquid phases at low temperatures other chapters consider the infrared spectrum of a mixture of N_2O_3 and N_2O_4 which has been studied in the liquid phase from 2 to 25 μ and in the solid phase from 2 to 35 μ both at low temperatures the final chapter describes the instrument developed for the measurement of rotatory dispersion and discusses some of the results obtained in the study of the complexes this book is a valuable resource for chemists
