Inline/Online 2001-07-01 janet abbate recounts the key players and technologies that allowed the internet to develop but her main focus is always on the social and cultural factors that influenced the internet s design and use since the late 1960s the internet has grown from a single experimental network serving a dozen sites in the united states to a network of networks linking millions of computers worldwide in inventing the internet janet abbate recounts the key players and technologies that allowed the internet to develop but her main focus is always on the social and cultural factors that influenced the internets design and use the story she unfolds is an often twisting tale of collaboration and conflict among a remarkable variety of players including government and military agencies computer scientists in academia and industry graduate students telecommunications companies standards organizations and network users the story starts with the early networking breakthroughs formulated in cold war think tanks and realized in the defense department s creation of the arpanet it ends with the emergence of the internet and its rapid and seemingly chaotic growth abbate looks at how academic and military influences and attitudes shaped both networks how the usual lines between producer and user of a technology were crossed with interesting and unique results and how later users invented their own very successful applications such as electronic mail and the world wide she concludes that such applications continue the trend of decentralized user driven development that has characterized the internet s entire history and that the key to the internet s success has been a commitment to flexibility and diversity both in technical design and in organizational culture

Inventing the Internet 2000-07-24 the internet has been transformed in the past years from a system primarily oriented on information provision into a medium for communication and community building the notion of 2 0 social software and social networking sites such as facebook twitter and myspace have emerged in this context with such platforms comes the massive provision and storage of personal data that are systematically evaluated marketed and used for targeting users with advertising in a world of global economic competition economic crisis and fear of terrorism after 9 11 both corporations and state institutions have a growing interest in accessing this personal data here contributors explore this changing landscape by addressing topics such as commercial data collection by advertising consumer sites and interactive media self disclosure in the social web surveillance of file sharers privacy in the age of the internet civil watch surveillance on social networking sites and networked interactive surveillance in transnational space this book is a result of a research action launched by the intergovernmental network cost european cooperation in science and technology

Internet and Surveillance 2013-06-17 the impact on modern society made by the internet is immeasurable yet some questioned why anyone would want such a thing when the idea was first introduced part history part memoir and part cultural study network geeks charts the creation of the internet and the establishment of the internet engineering task force from the viewpoint of a self proclaimed geek who witnessed these developments first hand with boundless enthusiasm and abundant humour brian carpenter leads the reader on a journey from post war britain to post millennium new zealand describing how the internet grew into today s ubiquitous global network including the genesis of the world wide in the hotbeds of a particle collider at cern illuminating the science and technology behind the apparent magic trick of the internet network geeks opens a window into the initially bewildering world of the internet engineering geek after reading this book you may wish to join this world yourself

Network Geeks 2013-04-23 the internet has become an indispensable tool for communications research and commerce but this report addresses the growing public concern at the internet s dark side the easy availability of hardcore pornography which people may find offensive the uploading by ordinary people of film of real fights bullying or alleged rape or the setting up of websites encouraging others to follow extreme diets or self harm or even commit suicide in particular there is increasing anxiety among parents about the use of social networking sites and chatrooms for grooming and sexual predation the committee welcomes the government commissioned report by dr tanya byron on the risks posed by the internet to children and agrees that a uk council for child internet safety should be established sites which host user generated content typically photos and videos uploaded by members of

the public have taken some steps to set minimum standards for that content the committee recommends that proactive review of content should be standard practice for such sites and calls for provision of high profile facilities for reporting abuse or unwelcome behaviour directly to law enforcement and support organisations there is a distinct issue about labelling of video games to indicate the nature of their content two systems currently exist side by side the industry awards its own ratings and the british board of film classification awards classifications to a small number of games which feature content unsuitable for children the dual system is confusing and bbfc should have responsibility for rating games with content appropriate for adults or teenagers

Harmful Content on the Internet and in Video Games 2008-07-31 nothing seems more far removed from the visceral bodily experience of emotions than the cold rational technology of the internet but as this collection shows the internet and emotions intersect in interesting and surprising ways internet and emotions is the fruit of an interdisciplinary collaboration of scholars from the sociology of emotions and communication and media studies it features theoretical and empirical chapters from international researchers who investigate a wide range of issues concerning the sociology of emotions in the context of new media the book fills a substantial gap in the social research of digital technology and examines whether the internet invokes emotional states differently from other media and unmediated situations how emotions are mobilized and internalized into online practices and how the social definitions of emotions are changing with the emergence of the internet it explores a wide range of behaviors and emotions from love to mourning anger resentment and sadness what happens to our emotional life in a mediated disembodied environment without the bodily element of physical co presence to set off emotional exchanges are there qualitatively new kinds of emotional exchanges taking place on the internet these are only some of the questions explored in the chapters of this book with quite surprising answers
