the twelfth century french poet chrétien de troyes is a major figure in european literature his courtly romances fathered the arthurian tradition and influenced countless other poets in england as well as on the continent yet because of the difficulty of capturing his swift moving style in translation english speaking audiences are largely unfamiliar with the pleasures of reading his poems now for the first time an experienced translator of medieval verse who is himself a poet provides a translation of chrétien s major poem yvain in verse that fully and satisfyingly captures the movement the sense and the spirit of the old french original yvain is a courtly romance with a moral tenor it is ironic and sometimes bawdy the poetry is crisp and vivid in addition the psychological and the socio historical perceptions of the poem are of profound literary and historical importance for it evokes the emotions and the values of a flourishing vibrant medieval past

this work is a collection of short reviews on membranes and transport it portrays the field as a mosaic of bright little pieces which are interesting in themselves but gain full significance when viewed as a whole traditional boundaries are set aside and biochemists biophysicists physiologists and cell biologists enter into a natural discourse the principal motivation of this work was to ease the problems of communication that arose from the explosive growth and interdisciplinary character of membrane research in these volumes we hope to provide a readily available comprehensive source of critical information covering many of the exciting recent developments on the structure biosynthesis and function of biological membranes in microorganisms animal cells and plants the 182 reviews contributed by leading authorities should enable experts to check up on recent developments in neighboring areas of research allow teachers to organize material for membrane and transport courses and give advanced students the opportunity to gain a broad view of the topic special attention was given to developments that are expected to open new areas of investigation the result is a kaleidoscope of facts viewpoints theories and techniques which radiates the excitement of this important field publication of these status reports every few years should enable us to follow progress in an interesting and easygoing format i am grateful to the authors to plenum publishing corporation and to several of my colleagues for their thoughtful suggestions and enthusiastic cooperation which made this work possible
