in the last several decades there has been a surge of interest in expertise in the social scientific philosophical and legal literatures while it is tempting to attribute this surge of interest in expertise to the emergence and consolidation of a knowledge society post industrial society or network society it is more likely that the debates about expertise are symptomatic of significant change and upheaval as the number of contenders for expert status has increased as the bases for their claims have become more diverse and as the struggles between these would be experts intensified expertise became problematic and contested in the oxford handbook of expertise and democratic politics gil eyal and thomas medvetz have brought together a broad group of scholars who have engaged substantively and theoretically with debates regarding the nature of expertise and the social roles of experts to examine these areas within sociology and allied disciplines the analyses take an historical and relational approach to the topic and are motivated by the sense that growing mistrust in experts represents a danger to democratic politics today the chapters will be organized into three general parts key theoretical and historical debates the politics of expertise and expertise within and across professional disciplinary legal and intellectual spheres among the topics considered here are the value and relevance of the boundary between experts and laypeople the causes and consequences of mistrust in experts the meanings and social uses of objectivity and the significance of recent transformations in the organization of the professions bringing together investigations from social scientists philosophers and legal scholars into the political dimensions of expertise this handbook connects interdisciplinary work done in science and technology studies with the more classic concerns topics and concepts of sociologists of professions and intellectuals
