today s leading economists weigh in with a new dashboard of metrics for measuring our economic and social health what we measure affects what we do if we focus only on material well being on say the production of goods rather than on health

education and the environment we become distorted in the same way that these measures are distorted joseph e stiglitz a consensus has emerged among key experts that our conventional economic measures are out of sync with how most people live their lives gdp they argue is a poor and outmoded measure of our well being the global movement to move beyond gdp has attracted some of the world s leading economists statisticians and social thinkers who have worked collectively to articulate new approaches to measuring economic well being and social progress in the decade since the 2008 economic crisis these experts have come together to determine what indicators can actually tell us about people s lives in the first book of its kind leading economists from around the world including thomas piketty emmanuel saez elizabeth beasley jacob hacker françois bourguignon nora lustig alan b krueger and joseph e stiglitz describe a range of fascinating metrics from economic insecurity and environmental sustainability to inequality of opportunity and levels of trust and resilience that can be used to supplement the simplistic measure of gross domestic product providing a far more nuanced and accurate account of societal health and well being this groundbreaking volume is sure to provide a major source of ideas and inspiration for one of the most important intellectual movements of our time
