daydreaming our ability to give to airy nothing a local habitation and a name remains one of the least understood aspects of human behaviour as children we explore beyond the boundaries of our experience by projecting ourselves into the mysterious worlds outside our reach as adolescents and adults we transcend frustration by dreams of achievement or escape and use daydreaming as a way out of intolerable situations and to help survive boredom drudgery or routine in old age we turn back to happier memories as a relief from loneliness or frailty or wistfully daydream about what we would do if we had our time over again why is it that we have the ability to alternate between fantasy and reality is it possible to have ambition or the ability to experiment create or invent without the catalyst of fantasy are sexual fantasies an inherent part of human behaviour are they universal healthy destructive is daydreaming itself destructive or is it a force which facilitates change and which can even be harnessed to positive advantage in this provocative book originally published in 1975 the product of the previous twenty five years of research the author debates the nature and function of daydreaming in the light of his own experiments as well as investigating what is a normal fantasy life and outlining patterns and types of daydreaming he describes the role of daydreaming in schizophrenia and paranoia examines the fantasies and hallucinations induced by drugs and also the nature of altered states of consciousness in zen and transcendental meditation among the many topics covered he explains how it is possible to help children enlarge their capacity for fantasy how adults can make positive use of daydreaming and how people on the verge of disturbed behaviour are often unconscious of their own fantasies advances in scientific methods and new experimental techniques had made it possible at this time to monitor both conscious daydreaming and sub conscious fantasies in a way not possible before professor singer is one of the few scientists who have conducted substantial research in this area and it is his belief that the study of daydreaming and fantasy is of great importance if we are to understand the workings of the human mind

krantz provides a defense of traditional human centered ethics against peter singer s ethical theory singer favors a copernican revolution in ethics because he thinks our traditional ethics has collapsed under pressure from medical technology and from advances in the biological understanding of our fellow animals for nearly thirty years he has argued that the boundaries of the human lifespan and of the human species are so unclear that we must abandon our views that human beings have a special dignity and that the taking of innocent human life is always wrong against this krantz argues that in today s world human life has been cheapened

and the values of the marketplace have begun to govern medical care and organ donation birth and death in fact this is just a foretaste of the world to come if singer's ethical theory succeeds in replacing traditional human centered ethics what is required is not the abandonment of human dignity and of the sanctity of human life but rather a renewed understanding of how principles based on these ideas can be applied in the twenty first century scholars students and general readers involved with ethical and contemporary philosophy issues will find this book interesting

modern critics and contemporary readers familiar with the field of whitman criticism may find surprising an analysis of the structure of leaves of grass that concerns itself with whitman as the poet prophet and the identification of whitman or of his persona in the poem with christ early twentieth century criticism has tended to exalt the early whitman at the expense of the later one and to regard as poetically inferior the image of the national and democratically prophetic whitman as expressed in the later editions thomas edward crawley in full knowledge of the contemporary currents of whitman criticism chooses to revert to this older view through which he sheds new light on whitman s artistic achievement the basic premise of this study is that walt whitman s leaves of grass is a unified work lyrical yet epic in quality design and spirit crawley s purpose is to demonstrate the basis of this unity its origin and operation and the nature of its realization he demonstrates that an aesthetically maturing whitman in this work was finally able to harmoniously bring together his individual and social subject matter crawley defines the unifying spirit of leaves of grass in terms of whitman s concept of the poet prophet and the poet reader relationship this concept is conveyed primarily through the development of the christ symbol the dominant image in the poem through a careful analysis of whitman s handling of the simultaneous development of the poet prophet and the nation his masterful fusion of the personal element and the national element an understanding of the complex structure of leaves of grass emerges crawley presents an analysis of whitman s final and carefully arrived at grouping of the lyrics in the 1881 edition according to a definite distinguishable pattern a pattern revealed in whitman s use of allusions in his transitional poems and passages and most important in his thematic handling of imagery the cumulative effect of these devices is emphasized the organic development of leaves of grass made possible by whitman s faith in and careful adherence to his concept of the organic theory of art is substantiated crawley concludes his analysis with a detailed examination of the growth of leaves of grass as reflected in the various editions leading up to the 1881 volume the last to be revised and published by whitman
