in the decades it takes to bring up a child parents face challenges that are both helped and hindered by the fact that they are living through a period of unprecedented digital innovation drawing on extensive research with diverse parents this book reveals how digital technologies give personal and political parenting struggles a distinctive character as parents determine how to forge new territory with little precedent or support the book reveals the pincer movement of parenting in late modernity parents are both more burdened with responsibilities and charged with respecting the agency of their child leaving much to negotiate in today s democratic families the book charts how parents now often enact authority and values through digital technologies as screen time games or social media become ways of both being together and setting boundaries the authors show how digital technologies introduce both valued opportunities and new sources of risk to light their way parents comb through the hazy memories of their own childhoods and look toward varied imagined futures this results in deeply diverse parenting in the present as parents move between embracing resisting or balancing the role of technology in their own and their children s lives this book moves beyond the panicky headlines to offer a deeply researched exploration of what it means to parent in a period of significant social and technological change drawing on qualitative and quantitative research in the united kingdom the book offers conclusions and insights relevant to parents policymakers educators and researchers everywhere
