sodium hydroxide wikipedia

Mar 26 2024

sodium hydroxide also known as lye and caustic soda is an inorganic compound with the formula naoh it is a white solid ionic compound consisting of sodium cations na and hydroxide anions oh sodium hydroxide is a highly corrosive base and alkali that decomposes lipids and proteins at ambient temperatures and may cause severe chemical

sodium hydroxide definition common name uses britannica

Feb 25 2024

sodium hydroxide naoh a corrosive white crystalline solid that contains the na cation and the oh anion it readily absorbs moisture until it dissolves sodium hydroxide is the most widely used industrial alkali and is often used in drain and oven cleaners

sodium hydroxide chemical safety facts

Jan 24 2024

updated october 14 2022 sodium hydroxide sodium hydroxide naoh also known as caustic soda or lye is a highly versatile substance used in a variety of manufacturing processes sodium hydroxide is a co product of chlorine production key points overview uses benefits safety information faqs related

resources share key points overview

naoh sodium hydroxide structure properties uses health

Dec 23 2023

sodium hydroxide is a white translucent crystalline solid it is commonly referred to as caustic soda due to its corrosive action on many substances it decomposes proteins at room temperatures and may cause chemical burns to human bodies

sodium hydroxide naoh cid 14798 pubchem

Nov 22 2023

sodium hydroxide is very corrosive it is generally used as a solid or a 50 solution other common names include caustic soda and lye sodium hydroxide is used to manufacture soaps rayon paper explosives dyestuffs and petroleum products

sodium hydroxide wikiwand

Oct 21 2023

close sodium hydroxide is a highly corrosive base and alkali that decomposes lipids and proteins at ambient temperatures and may cause severe chemical burns it is highly soluble in water and readily

absorbs moisture and carbon dioxide from the air it forms a series of hydrates $\text{NaOH} \cdot n\text{H}_2\text{O}$

15 3 common bases and their uses chemistry libretexts

sodium hydroxide encyclopedia com

Aug 19 2023

sodium hydroxide NaOH also known as lye or caustic soda is an extremely caustic corrosive and
damaging to human tissue white solid that readily dissolves in water sodium hydroxide is used in the
manufacture of soaps rayon and paper in petroleum refining and in homes as drain cleaners and
oven cleaners sodium hydroxide is one of the

sodium hydroxide formula properties application

Jul 18 2023

chemical properties sodium hydroxide is a strong base and ranks as one of the most commonly used alkalis it has a high affinity for water undergoing exothermic reactions when combined with it which can be used to generate considerable amounts of heat this is often exploited in many applications that require the increase of temperature

sodium hydroxide simple english wikipedia the free

Jun 17 2023

sodium hydroxide is an alkali which is also known as caustic soda caustic means burning and caustic soda takes its name from the way it can burn the skin it has the chemical formula of NaOH it is a base meaning it has a high pH it is the most common thing used to raise the pH of solutions for example to neutralize an acid

sodium hydroxide naoh formula properties preparation uses

May 16 2023

sodium hydroxide NaOH exhibits hygroscopic properties leading to its ability to readily absorb moisture from the surrounding atmosphere the substance shows a high degree of corrosiveness thereby posing the potential to induce significant skin burns and irritation to the ocular and other anatomical regions

sodium hydroxide new world encyclopedia

Apr 15 2023

chemical properties sodium hydroxide is completely ionic containing sodium ions and hydroxide ions the hydroxide ion makes sodium hydroxide a strong base which reacts with acids to form water and the corresponding salts for example with hydrochloric acid sodium chloride is formed $\text{NaOH} + \text{HCl} \rightarrow \text{NaCl} + \text{H}_2\text{O}$

sodium hydroxide in skin care is it safe healthline

Mar 14 2023

sodium hydroxide is overall considered safe for general use but only in small amounts at lower concentrations at higher concentrations sodium hydroxide is unsafe it can cause chemical

hydroxide wikipedia

Feb 13 2023

sodium hydroxide is a multi million ton per annum commodity chemical the corresponding electrically neutral compound is the hydroxyl radical the corresponding covalently bound group of atoms is the hydroxy group both the hydroxide ion and hydroxy group are nucleophiles and can act as catalysts in organic chemistry

ph scale acids bases ph and buffers article khan academy

Jan 12 2023

to give you the short answer an acidic solution has a high concentration of hydrogen ions H^+ greater than that of pure water a basic solution has a low H^+ concentration less than that of pure water to see where this definition comes from let's look at the acid base properties of water itself autoionization of water

sodium hydroxide toxfaq's atsd centers for disease

Dec 11 2022

sodium hydroxide is used to manufacture soaps rayon paper explosives dyestuffs and petroleum products it is also used in processing cotton fabric laundering and bleaching metal cleaning and processing oxide coating electroplating and electrolytic extracting it is commonly present in commercial drain and oven cleaners top of page

sodium hydroxide niosh cdc centers for disease control

Nov 10 2022

overview cas no 1310-73-2 sodium hydroxide naoh has no smell it is made of solid white crystals that absorb water from the air sodium hydroxide is caustic sodium hydroxide can harm workers who
