The Constitution of Ireland and Poyning's Laws Explained. By a Friend to His Country [Robert French]. 1770 this book is about sleeping and dreaming as explained by arts and science where sleep is described as being the natural periodic suspension of consciousness during which the powers of the body are restored the contents detail the body's relaxation as induced by graded switching off of the nerves all species of mammals undergo regular periods of it varying with age species and with the seasonal changes of day length sleep is a natural state of torpor and a lowering of consciousness associated with changes in the patterns of electrical waves recorded from the brain additionally it clarifies the dream states as a series of thoughts images poetry or emotions occurring during sleep dreams can also be experiences of waking life having the characteristics of a dream as a visionary creation of the imagination as a day dream state of mind marked by abstraction or release from reality a reverie as an object seen in a dream like state and vision as a wishful creation of the imagination

Isaiah Translated and Explained by Joseph Addison Alexander 1856 this text outlines the major statistical tests used by undergraduates in the social sciences it provides easy to understand explanations of how and why they are used and aims to make statistics much less mysterious

Witchcraft of New England Explained by Modern Spiritualism 1880 climates and weather explained is a comprehensive introduction to the study of the atmosphere integrating climatology and meteorology clear explanations of basic principles concepts and processes are supported by a wealth of highly informative illustrations and a vast array of case studies demonstrating the relevance of weather and climate to everyday life focusing particularly on the southern hemisphere the authors provide fresh insights into topical environmental concerns from global warming and natural hazards to sustainable global population the textbook is supplemented by a unique interactive student downloadable resources containing entirely additional material for practical work and more advanced study closely related to each chapter of the book the student downloadable resources features over 170 extra notes 40 illustrations and tables multiple choice self assessment and practical exercises extended glossary and key word searching hypertext presentation and extensive cross referencing a gallery of meteorological photographs in full colour a special instructors resource pack is also available

SLEEPING AND DREAMING EXPLAINED BY ARTS & SCIENCE 2016-10-11 did the universe start with a big bang is light a wave a particle or both are we the cause of global warming science has made it possible to comprehend the world we live in and the theoretical multiverses beyond offering technological advances and extending the frontiers of knowledge written in plain english the science book presents 80 of the most trailblazing ideas in physics chemistry and biology it is packed with short pithy explanations that cut through the jargon step by step diagrams that untangle knotty theories classic quotes that make scientific discoveries memorable and witty illustrations that enhance and play with our understanding of science whatever your grasp of the subject whether you're a keen student or an armchair expert you'll find plenty to stimulate you within this book part of the popular big ideas series the science book is the perfect way to explore this fascinating subject

The Geography System of Herodotus Examined and Explained, by a Comparison with Those of Other Ancient Authors, and with Modern Geography ... 1830 this volume explores higher level critical and creative thinking as well as reflective decision making and problem solving what teachers should emphasize when teaching literacy across the curriculum focusing on how to encourage learners to become independent thinking learning and communicating participants in home school and community environments this book is concerned with integrated learning in a curriculum of inclusion it emphasizes how to provide a curriculum for students where they are socially interactive personally reflective and academically informed contributors are authorities on such topics as cognition and learning classroom climates knowledge bases of the curriculum the use of technology strategic reading and learning imagery and analogy as a source of creative thinking the nature of motivation the affective domain in learning cognitive apprenticeships conceptual development across the disciplines thinking through the use of literature the impact of the media on thinking the nature of the new classroom developing the ability to read words the bilingual multicultural learner crosscultural literacy and reaching the special learner the applications of higher level thought to classroom contexts and materials are provided so that experienced teacher educators and psychologists are able to implement some of the abstractions that are frequently dealt with in texts on cognition theoretical constructs are grounded in educational experience giving the volume a practical dimension finally appropriate concerns regarding the new media hypertext bilingualism and multiculturalism as they reflect variation in cognitive experience within the contexts of learning are presented

Statistics Explained 1995 research based spin off companies are a special subgroup of new technology based ventures and play an important role for innovation and economic development executive teams of academic spin offs face several challenges in building up sustainable and profitable ventures because they often lack managerial and entrepreneurial skills based on a quantitative analysis of 193 german spin offs rigotietz examines the relationships between executive team characteristics strategic decision making and firm performance the study contributes to the entrepreneurship and strategic management literature and has practical implications for entrepreneurs and managers policymakers and practitioners of start up initiatives and technology transfer organisations

Isaiah, Translated and Explained: Isaiah I-XXXV 1861 the alternation between the auxiliaries be and have which this collection examines is often discussed in connection with generative analyses of split intransitivity but this book's purpose is to place the phenomenon in a broader context well known facts in the romance and germanic language families are extended with data from lesser studied languages and dialects romanian paduan and also with experimental and historical data moreover the book goes beyond the usual language families in which the phenomenon has been studied with the inclusion of two chapters on chinese and korean the theoretical background of the contributors is also broad ranging from current generative approaches to cognitive and optimality theoretical frameworks readers interested in the structural historical developmental or experimental aspects of auxiliary selection should profit from this book's comprehensive empirical coverage and from the plurality of contemporary linguistic analyses it contains

The Acts of the Apostles Explained 1857 in this classic study alan brudner investigates the basic structure of the common law of transactions for decades that structure has been the subject of intense debate between formalists who say that transactional law is a private law for interacting parties and functionalists who say that it is a public law serving the collective ends of society against both camps brudner proposes a synthesis of formalism and functionalism in which private law is modified by a common good without being subservient to it drawing on hegel s legal philosophy the author exhibits this synthesis in each of transactional law s main divisions property contract unjust enrichment and tort each is a whole composed of private law and public law parts that complement each other and the idea connecting the parts to each other is also latently present in each moreover brudner argues a single narrative thread connects the divisions of transactional law to each other not a row of disconnected fields transactional law is rather a story about the realization in law of the agent s claim to be a dignified end master of its body its acquisitions and the shape of its life transactional law s divisions are stages in the progress toward that goal each generating a potential developed by the next thus contract law fulfils what is incompletely realized in property law negligence law what is germinal in contract law public insurance what is seminal in negligence law and transactional law as a whole what is underdeveloped in public insurance the end point is the limit of what a transactional law can contribute to a life sufficient for dignity reconfigured and expanded with a contribution by jennifer nadler the unity of the common law stands out among contemporary theories of private law in that it depicts private law as purposive without being instrumental and as autonomous without being emptily formal

The prophecies of the second book of Esdras, amongst the Apocrypha, explained and vindicated from the objections made against them. To which are added, A comment on the prophecies of Zachary and Micah: with some observations concerning the prophecies of Daniel and Malachi [&c.]. 1721 vygotsky s developmental and educational psychology aims to demonstrate how we can come to a new and original understanding of vygotsky s theories through knowledge of their cultural philosophical and historical context

Painting Popularly Explained ... Fourth Edition, Revised and Enlarged 1876 this revised and updated text contains a range of relevant interesting case law statutory material academic extracts and official proposals for law reform a companion web site featuring web links and case updates ensures students have access to the latest materials

Theology Explained & Defended ... 1828 the phylontogenic theory proposes an original understanding of nose sinus and midface formation and development by looking back in evolution for the first traces of the olfactory organ and then tracing its successive phyletic transformations to become part of the respiratory apparatus and finally the central point of human facial anatomy von baer s darwin s haeckel s garstang s gould s and buss explorations of parallels between phylogeny and ontogeny help to trace the nose and midface story the paradigm of existing parallels between ontogeny and phylogeny proves useful both in seeking to understand the holoprosencephalic spectrum of facial malformations which represent radically different pathways of facial development after the life s tape has been started to run again and in formulating hypotheses on chordate to vertebrate evolution the phylontogenic theory leads to new medical hypotheses on nose and sinus diseases and opens the field of evolution and development based medicine
