2023 adk stab fp 2500s is the low dust version of adk stab fp 2200s our newly developed nitrogen phosphorus based flame retardant used mainly for polyolefin

properties white powder thermal decomposition 260 c  
features and applications effects performance low heat  
release very low smoke release and very low smoke  
density

material data center adk stab Sep 24 2023 adk stab fp  
2100 and 2200 are halogen free intumescent flame  
retardants based on phosphorous and nitrogen for  
polypropylene homo and copolymer as well as  
polyethylene all the products meet the requirements of  
ul94 v0 at 1.6mm

adk stab fp 2100jc adeka polymer additives europe Aug  
24 2023 adk stab fp 2100jc is a nitrogen phosphorus  
based halogen free flame retardant for polyolefins adk  
stab fp 2100jc is an intumescent system showing  
excellent flame retardency with retention of mechanical  
properties adk stab fp 2100jc is considered to  
represent a technical breakthrough in flame retardants  
for pp in particular

additives adeka Jul 23 2023 adeka afes super  
controller was developed in the technology that we  
cultivated in adeka chelumica fe series and adeka afes  
controller adeka chelumica tfe series are an epoch  
making and new etchant for fine pattern etching this  
new etchant offers a breakthrough in subtractive  
etching process items product name

**plastics additives at k 2007 sciencedirect Jun 21 2023**  
adk stab fp 2100 and fp 2200 perform in most common  
polyolefins including homo block and random pp pe hd  
and pe lld at relatively low loading levels targeted  
applications are thick section extrusions as well as  
injection moulded and selected thin wall applications  
for example cable jacketing and films

adk stab for adeka corporation ul prospector May 21  
2023 home adk stab fp 2100jc generic family additive  
flame retardant phosphorus compounds supplied by adeka  
corporation flame retardant for polyolefins is  
recommended for use in polypropylene pp homopolymer and  
copolymer high and low density polyethylene pe ethylene

vinyl acetate copolymer and others

adeka subsidiary building intumescent flame retardants

Apr 19 2023 adeka developed its halogen free intumescent flame retardants in 2001 and already has a small scale unit producing adk stab fp 2100j and fp 2200 at its fuji plant

material data center palmarole Mar 19 2023 adk stab fp 2100 and 2200 are halogen free intumescent flame retardants based on phosphorous and nitrogen for polypropylene homo and copolymer as well as polyethylen kunststoffe international 2008 02 17 growth in specialties tronic equipment effectively ban the use of some critically assessed substances in electronic components
