the exit door leads in is a science fiction short story by american writer philip k dick first published in 1979 the exit door leads in was written for rolling stone college papers a short lived publication it is one of dick s few stories created at the request of editors leading to the exit discharge exit route doors must be unlocked from the inside they must be free of devices or alarms that could restrict use of the exit route if the device or alarm fails side hinged exit doors must be used to connect rooms to exit routes these doors must swing out in the direction of exit travel if the room is the manuscript for the exit door leads in arrived at the smla on jun 21 1979 the story was requested by the editors of rolling stone college papers a new and short lived publication the story was published in the first issue of rolling stone college papers later in fall 1979 terry carr selected the story for his anthology the best sf of the exit door leads in philip k dick audiobook philip k dick 1979 rolling stone college papers audio recording by paul michael garciano copyright claims above all exit doors should always lead to an exterior or equivalent safe area separated from other areas means of egress components these are the specific physical requirements for a means of egress to meet the nfpa 101 standards and codes it is one of dick s few stories created at the request of editors it was reprinted in terry carr s the best science fiction of the year 9 the exit door leads in is a science fiction short story by american writer philip k dick first published in 1979 types of permissible exits are doors leading directly outside or through a protected passage to the outside smoke proof towers interior and outside stairs ramps and escalators in existing buildings an exit route consists of three parts exit access a part of an exit route that leads to exit discharge exit discharge means the part of the exit route that leads directly outside or to a street walkway refuge area public way or open space with access to the outside an example of an exit discharge is a door at the bottom of a two hour fire resistance rated enclosed stairway that discharges to a place of safety outside the building each exit discharge must lead directly outside or to a street walkway refuge area public way or open space with access to the outside 29 cfr 1910.36(c)(1) the street walkway refuge area public way or open space to which an exit discharge leads must be large enough to accommodate the building occupants likely to use the exit route the exit door leads in rolling stone college papers no 1 fall 1979 45 47 49 51 rpt in robots androids and mechanical oddities the science fiction of philip k dick the exit access leads from any occupied portion of a building to the exit the exit is the portion of a means of egress between the exit access and exit discharge including the exit doors exit stairways exterior exit ramps exit passageways and horizontal exits first there s the exit access the portion of an exit route that leads to an exit the second part is the exit the portion of an exit route that is generally separated from other areas to provide a protected way of travel to the exit discharge which is the third part of an exit route 1 each exit discharge must lead directly outside or to a street walkway refuge area public way or open space with access to the outside 2 the street walkway refuge area public way or open space to which an exit discharge leads must be large enough to accommodate the building occupants likely to use the exit route exit pathways must be at least 28 inches in wide and the ceilings along exit routes must be at least 7 feet ft 6 in high exit doors must be unlocked from the inside and exit routes must remain free of explosive or highly flammable furnishings and other decorations exit access portion of an exit route that leads to an exit exit portion of an exit route that is generally separated from other areas to provide a protected way of travel to the exit discharge an exit route consists of exit access the space that leads to an exit the exit itself which is separated from other areas so it protects people using the exit and the exit discharge which leads to the street open space or a refuge area the door that connects any room to an exit route must swing out in the direction of exit travel if the room is designed to be occupied by more than 50 people or if the room is a high hazard area i e contains contents that are likely to burn with extreme rapidity or explode in a hazardous situation clearly identified traffic routes lead people out of the building or into a secured area as quickly as possible via emergency exits or panic doors at the same time they allow the fire service or an emergency doctor to take quick rescue action from outside whenever a fire breaks out in the building exit signs will show directions towards the escape routes while emergency lighting illuminates the areas to ensure the safe passage of people and termination of any risky processes international fire standards require that the sign bears the words exit written in bold letters visible from far we have recessed surface emergency lights mickey mouse lights fire exit sign weatherproof exit lights running man exit signs emergency exit sign wholesale prices free shipping options and attractive discounts available on all exit signage
