an illuminating contribution to scholarship on the vampire figure slavic review even before bram stoker immortalized transylvania as the homeland of his fictional count dracula the figure of the vampire was inextricably tied to eastern europe in the popular imagination drawing on a wealth of previously neglected sources this book offers a fascinating account of how vampires whose various incarnations originally emerged from folk traditions from all over the world became so strongly identified with eastern europe it demonstrates that the modern conception of the vampire was born in the crucible of the enlightenment embodying a mysterious eastern otherness that stood opposed to western rationality from the prologue from original sin to eternal life for a broad contemporary public the vampire has become a star a media sensation from hollywood bestselling authors such as bram stoker anne rice and stephenie meyer continue to fire the imaginations of young and old alike and bloodsuckers have achieved immortality through films like dracula interview with a vampire and twilight it is no wonder that in the teenage bedrooms of our globalized world vampires even steal the show from harry potter they have long since been assigned individual personalities and treated with sympathy they may possess superhuman powers but they are also burdened by their immortality and have to learn to come to terms with their craving for blood whereas the southeast european vampire discovered in the 1730s underwent an americanization and domestication in the media landscape of the twentieth century the creole zombies that first became known through the cheap novels and horror films of the 1920s still continue to serve as brainless horror figures do bloodsuckers really exist and should we really be afraid of the dead these are the questions that i seek to tackle following the wishes of my daughter who was ten when i started this project

a look at the forgotten ancestors of the modern day vampire many of which have very different characteristics looks at the many ancestral forms of the modern vampire including shroud eaters appesarts and stafi presents evidence for the reality of this phenomenon from pre 19th century newspaper articles and judicial records of all forms taken by the undead the vampire wields the most powerful pull on the modern imagination but the countless movies and books inspired by this child of the night who has a predilection for human blood are based on incidents recorded as fact in newspapers and judicial archives in the centuries preceding the works of bram stoker and other writers digging through these forgotten records claudelécouteux unearths a very different figure of the vampire in the many accounts of individuals who reportedly would return from their graves to attack the living these ancestors of the modern vampire were not all blood suckers they included shroud eaters appesarts nightmares and the curious figure of the stafia whose origin is a result of masons secretly interring the shadow of a living human being in the wall of a building under construction as lecousteux shows the belief in vampires predates ancient roman times which abounded with lamia stirges and ghouls discarding the tacked together explanations of modern science for these inexplicable phenomena the author looks back to another folk belief that has come down through the centuries like that of the undead the existence of multiple souls in every individual not all of which are able to move on to the next world after death

the greek church at one time taught that the bodies of persons upon whom the ban of excommunication had been passed did not undergo decomposition after death until such sentence had been revoked by the pronouncement of absolution over the remains and that while the bodies remained in this uncorrupted condition the spirits of the individuals wandered up and down the earth seeking sustenance from the blood of the living the non corruption of a body however was also held to be one of the proofs of sanctity but in this case the body preserved its natural colour and gave an agreeable odour whereas the bodies of the excommunicated generally turned black swelled out like a drum and emitted an offensive smell very frequently however when the graves of suspected vampires were opened the faces were found to be of ruddy complexion and the veins distended with blood which when opened with a lancet yielded a supply of blood as plentiful fresh and free as that found in the veins of young and healthy living human beings for many centuries in the history of greek christianity there was scarcely a village that had not its own local vampire stories which were related by the inhabitants and vouched for by them as having either occurred within their own knowledge or been related to them by their parents or relatives as having come within their personal observation or been verified by them
