Glencoe World History, Student Edition 2004-03-22 excerpt from world history the scope character and purpose of this textbook perhaps require some clarification here it covers the entire historic field together with a chapter on prehistoric times it presents a survey of human progress rather than a chronological outline of events it is intended for that large body of students who for various reasons do not take more than one year of history in the high school they ought to gain from such a course however brief some conception of social development and some realization of man s upward march from the stone age until the present time nothing but general or universal history will give them that conception that realization and only a history of the world will enable them to appreciate the contributions made by peoples widely separated in space and time to what is steadily becoming the common civilization of mankind about two thirds of the book are devoted to the last three centuries this period furnishes the immediate historical background of the life of to day it is therefore the period ordinarily most interesting and profitable to the student the chapters dealing with it are reproduced with some abbreviation from my modern european history the other chapters are based on my early european history but they contain much that is new both in the text and also by way of maps and illustrations about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority

World History Since 1400 2003-06-01 is the history of the modern world the history of europe writ large or is it possible to situate the history of modernity as a world historical process apart from its origins in western europe in this posthumous collection of essays marshall g s hodgson challenges adherents of both eurocentrism and multiculturalism to rethink the place of europe in world history he argues that the line that connects ancient greeks to the renaissance to modern times is an optical illusion and that a global and asia centred history can better locate the european experience in the shared histories of humanity hodgson then shifts the historical focus and in a parallel move seeks to locate the history of islamic civilisation in a world historical framework in so doing he concludes that there is but one history global history and that all partial or privileged accounts must necessarily be resituated in a world historical context the book also includes an introduction by the editor edmund burke contextualising hodgson s work in world history and islamic history

Methods in World History 2016-01-07 patterns of world history comes to the teaching of world history from the perspective of innovations the engine of historical change innovation is nothing new so what we advocate in this book is a distinct intellectual framework for understanding innovation through its patterns of origin interaction and adaptation each small or large technical or cultural innovation originated in one geographical center or independently in several different centers as people in the centers interacted with their neighbors the neighbors adapted to and in many cases were transformed by the innovations by adaptation we include the entire spectrum of human responses ranging from outright rejection to creative borrowing and at times forced acceptance what do we gain by studying world history as patterns of innovation first if we consider innovation to be a driving force of history it helps satisfy an intrinsic human curiosity about origins our own and others perhaps more importantly seeing patterns of innovation in

historical development brings to light connections and linkages among peoples cultures and regions that might not otherwise present themselves at the same time such patterns can also reveal differences among cultures that other approaches to world history tend to neglect for example the differences between the civilizations of the eastern and western hemispheres are generally highlighted in world history texts but the broad commonalities of human groups creating agriculturally based cities and states in widely separated areas also show deep parallels in their patterns of origins interactions and adaptations such comparisons are at the center of our approach second this kind of analysis offers insights into how an individual innovation was subsequently developed and diffused across space and time that is the patterns by which the new eventually becomes a necessity in our daily lives through all of this we gain a deeper appreciation of the unfolding of global history from its origins in small communities to the densely populated large countries in our present world finally our use of a broad based understanding of innovation allows us to restore culture in all its individual and institutionalized aspects spiritual artistic intellectual scientific to its rightful place alongside technology environment politics and socio economic conditions that is understanding innovation in this way allows this text to help illuminate the full range of human ingenuity over time and space in a comprehensive evenhanded and open ended fashion
