on may 26 2004 the new york times issued an apology for its coverage of iraq s purported weapons of mass destruction the times had failed to provide what most readers expect from the us newspaper of record journalistic accuracy and integrity about important matters of us foreign policy but the times coverage of iraq was worse than they were willing to concede in fact for at least the past fifty years the editorial policy of the times from its coverage of the 1954 geneva accords on vietnam to the issue of torture in abu ghraib has failed to incorporate international law into its coverage of us foreign policy this lapse as the authors demonstrate has profound implications for the quality of the times journalism and the function of the press in a country supposedly governed by the rule of law in this meticulously researched study howard friel and richard falk reveal how the times has consistently misreported major us foreign policy issues including the bombing of north vietnam in response to the tonkin gulf and pleiku incidents in 1964 65 the reagan administration s policy toward the sandinista government of nicaragua in the 1980s the 2002 military coup that briefly overthrew hugo chavez venezuela s elected president and the bush administration s 2003 invasion of iraq excerpt from paper in foreign countries uses of wood pulp vol 9 1892 and australian sheep and wool and works this paper describes and analyzes forward market systems with varying degrees of sophistication and it assesses them from the viewpoint of a smaller industrial or developing country asking itself how it could institute such a system or how it could further develop an existing system in a way consistent with its institutional and macroeconomic structure all industrial countries except iceland now have forward exchange markets in which the rate is determined by the market forward markets that have been liberalized in several countries in the 1980s have matured quickly there are several variants of market determined systems which could be envisaged an auction market could be devised for forward transactions but is unlikely to be practical because the supply of forward exchange probably may not be determined in advance sufficiently accurately as the last stage of its development the market could be extended from underlying commercial transactions to forward transactions of a purely financial character a process that is taking place in most of the few industrial countries that have retained regulated forward systems development of a forward market is not a panacea for incorrect financial policies in fact cultivation of the market will require the adoption and maintenance of realistic financial policies prior to 1870 the series was published under various names from 1870 to 1947 the uniform title papers relating to the foreign relations of the united states was used from 1947 to 1969 the name was changed to foreign relations of the united states diplomatic papers after that date the current name was adopted this book investigates whether a power shift has taken place in the asia pacific region since the end of the cold war by systematically examining the development of power dynamics in asia pacific it challenges the notion that a wealthier and militarily more powerful china is automatically turning the regional tides in its favour with a special emphasis on sino us competition the book explores the alleged linkage between the regional distribution of relevant material and immaterial capabilities national power and the much cited regional power shift the book presents a novel concept for measuring power in international relations by outlining a composite index on aggregated power ciap that includes 55 variables for 44 regional countries and covers a period of twenty years moreover it develops a middle power theory that outlines the significance of middle powers in times of major power shifts by addressing political military and economic cooperation via a structured focused comparison and by applying a comparative historical analysis the book analyses in depth the bilateral relations of six regional middle powers to washington and beijing the theory of semigroups is a relatively young branch of mathematics with most of the major results having appeared after the second world war this book describes the evolution of algebraic semigroup theory from its earliest origins to the establishment of a full fledged theory semigroup theory might be termed cold war mathematics because of the time during which it developed there were thriving schools on both sides of the iron curtain although the two sides were not always able to communicate with each other or even gain access to the other s publications a major theme of this book is the comparison of the approaches to the subject of mathematicians in east and west and the study of the extent to which contact between the two sides was possible developing countries in the east asia pacific region will see stable economic growth this year bolstered by a recovery in high income economies and the market s modest response so far to the federal reserve s tapering of its quantitative easing according to the east asia pacific economic update developing east asia will grow by 7 1 percent this year largely unchanged from 2013 the report says as a result east asia remains the fastest growing region in the world despite a slowdown from the average growth rate of 8 0 percent from 2009 to 2013 in china growth will ease slightly to 7 6 percent this year from 7 7 percent in 2013 excluding china the developing countries in the region will grow by 5 0 percent slightly down from 5 2 percent last year the objective of the 2014
