before the 99 occupied wall street before the concept of social justice had impinged on the social conscience before the social safety net had even been conceived by the turn of the 20th century the era of the robber barons andrew carnegie 1835 1919 had already accumulated a staggeringly large fortune he was one of the wealthiest people on the globe he guaranteed his position as one of the wealthiest men ever when he sold his steel business to create the united states steel corporation following that sale he spent his last 18 years he gave away nearly 90 of his fortune to charities foundations and universities his charitable efforts actually

started far earlier at the age of 33 he wrote a memo to himself noting the amassing of wealth is one of the worse species of idolatry no idol more debasing than the worship of money in 1881 he gave a library to his hometown of dunfermline scotland in 1889 he spelled out his belief that the rich should use their wealth to help enrich society in an article called the gospel of wealth this book carnegie writes that the best way of dealing with wealth inequality is for the wealthy to redistribute their surplus means in a responsible and thoughtful manner arguing that surplus wealth produces the greatest net benefit to society when it is administered carefully by the wealthy he also argues against extravagance irresponsible spending or self indulgence instead promoting the administration of capital during one s lifetime toward the cause of reducing the stratification between the rich and poor though written more than a century ago carnegie s words still ring true today urging a better more equitable world through greater social consciousness

The Theory of Money and Credit 1953

i am not writing this book to generate money for myself nonfiction book royalties can be good but one can t subsist on these i am writing this text because i look around every day and see such sadness in many people because they are not happy with their lives monetarily i talk to people who express this and see people on the street who obviously need help mostly through friends i hear their stories of lost jobs their children who graduated college some with master degrees and can t find meaningful work some who can t even work in fast food restaurants when i first got the idea of helping people with a text dealing with how to change your life monetarily i wanted it to be a simple here is how first do this and then do that however as i gave more and more thought to the book i realized the success of generating a lot of money was based on my life s experience starting when i was seven years old after giving much thought to my personal success i realized i was following my life s personal endeavor to achieve wealth and happiness which go together this success started at age seven and continues today in other words my autobiography many close friends and family have urged me over the decades to write about my life as it has been very unusual sometimes downright exciting i have responded with an emphatic no after all i m not famous i m just another grain of sand in an ocean of sand within the vast world we live in one night while having dinner at one of my favorite restaurants the sandbar in la quinta california a lady approached me and said i recognize you from television

but can't remember who you are i responded back no you are mistaken i'm not in show business she looked at me closely and said you mean you are a nobody i'll never forget that because she was right i'm a nobody so whenever i'm asked to write about myself i remember what she said this changed when deciding to write about changing your life forever monetarily i started my adventure at seven years of age and over the decades made and lost millions i generated in today's money fifteen million dollars over a thirteen year period the first time around i lost nearly all of it in thirty seconds when i responded to a question asked by my attorney responding with the word no instead of yes this is getting into the story so i'll let my reader discover it in sequence and yes i generated it back and this is why i'm writing this text so you too can do the same

we are well aware of the rise of the 1 as the rapid growth of economic inequality has put the majority of the world's wealth in the pockets of fewer and fewer one much discussed solution to this imbalance is to significantly increase the rate at which we tax the wealthy but with an enormous amount of the world's wealth hidden in tax havens in countries like switzerland luxembourg and the cayman islands this wealth cannot be fully accounted for and taxed fairly no one from economists to bankers to politicians has been able to quantify exactly how much of the world's assets are currently hidden until now gabriel zucman is the first economist to offer reliable insight into the actual extent of the world's money held in tax havens and it's staggering in the hidden wealth of nations zucman offers an inventive and sophisticated approach to quantifying how big the problem is how tax havens work and are organized and how we can begin to approach a solution his research reveals that tax havens are a quickly growing danger to the world economy in the past five years the amount of wealth in tax havens has increased over 25 there has never been as much money held offshore as there is today this hidden wealth accounts for at least 7.6 trillion equivalent to 8% of the global financial assets of households fighting the notion that any attempts to vanquish tax havens are futile since some countries will always offer more advantageous tax rates than others as well the counter argument that since the financial crisis tax havens have disappeared zucman shows how both sides are actually very wrong in the hidden wealth of nations he offers an ambitious agenda for reform focused on ways in which countries can change the incentives of tax havens only by first understanding the enormity of the secret wealth can we begin to estimate the kind of actions that would force tax havens to give up their practices zucman's work has quickly become the gold standard for quantifying the amount of the world's assets held in havens in this concise book he lays out in approachable language how the international banking system works and the dangerous extent to which the large scale evasion of taxes is undermining the global market as a whole if we are to find a way to solve the problem of increasing inequality the hidden wealth of nations is essential reading
