Move Fast and Break Things

2023-09-11

the book that started the techlash a stinging polemic that traces the destructive monopolization of the internet by google facebook and amazon and that proposes a new future for musicians journalists authors and filmmakers in the digital age move fast and break things is the riveting account of a small group of libertarian entrepreneurs who in the 1990s began to hijack the original decentralized vision of the internet in the process creating three monopoly firms facebook amazon and google that now determine the future of the music film television publishing and news industries jonathan taplin offers a succinct and powerful history of how online life began to be shaped around the values of the men who founded these companies including peter thiel and larry page overlooking piracy of books music and film while hiding behind opaque business practices and subordinating the privacy of individual users in order to create the surveillance marketing monoculture in which we now live the enormous profits that have come with this concentration of power tell their own

story since 2001 newspaper and music revenues have fallen by 70 percent book publishing film and television profits have also fallen dramatically revenues at google in this same period grew from 400 million to 74.5 billion today google's youtube controls 60 percent of all streaming audio business but pay for only 11 percent of the total streaming audio revenues artists receive more creative content is being consumed than ever before but less revenue is flowing to the creators and owners of that content the stakes here go far beyond the livelihood of any one musician or journalist as taplin observes the fact that more and more americans receive their news as well as music and other forms of entertainment from a small group of companies poses a real threat to democracy move fast and break things offers a vital forward thinking prescription for how artists can reclaim their audiences using knowledge of the past and a determination to work together using his own half century career as a music and film producer and early pioneer of streaming video online taplin offers new ways to think about the design of the world wide and specifically the way we live with the firms that dominate it

longlisted for the dublin literary award 2018 crime book of the month sunday times february 2018 a tough close up look at a side of female life that's often hard to acknowledge the violence girls and women sometimes display towards other girls and women an accomplished writer who will go far margaret atwood stella a young métis mother lives with her family by the break an isolated strip of land on the edge of their small canadian town glancing out of her window one winter's evening stella spots someone in trouble horrified she calls the police but when they arrive no one is there scuff marks in the compacted snow the only sign anything may have happened what follows is a heartbreaking and powerful tale of a community in crisis as the people connected to the victim a young girl on the edge of a precipice begin to lay bare their stories leading up to that fateful night from lou a social worker grappling with the end of a relationship to cheryl an artist mourning the premature death of her sister and from phoenix a homeless teenager released from a youth detention centre with no one to turn to to officer scott a métis policeman caught between two worlds through the prism of one extended intergenerational family vermette's urgent story shines a light on the power violence and love shared between women of all cultures creeds and ages

The Edge of the Plain: How Borders Make and Break Our World

1999-06-08

a wide ranging journey through the history of borders and an exploration of their role in shaping our world today since the earliest known marker denoting the edge of one land and the beginning of the next a stone column inscribed with sumerian cuneiform borders have been imagined mapped moved and fought over in the edge of the plain james crawford skillfully blends history travel writing and reportage to trace these borderlines throughout history and across the globe what happens on the ground when we impose lines on a map that contradict how humans have always lived and moved crawford confronts that question from bloody territorial disputes in mesopotamia to the sápmi lands of scandinavia the shifting boundaries of the israel palestine conflict efforts to build a wall on the united states mexico border and the dangerous border crossings pursued by migrants into europe and yet the role of borders extends beyond specific sites of conflict on the largest scale borders define the limits of empire the two walls in britain that once represented the northwestern edge of the roman empire the mythological eastern gate supposedly closed off by alexander the great china's virtual great firewall on the smallest human scale cell walls are the last physical barrier against disease after lines of quarantine have failed finally as the edge of the plain reveals humans have not only made their mark on the landscape the landscape itself is now changing more and more rapidly due to climate change crawford introduces us to both the alpine watershed one such shifting natural borderline and the great green wall in africa envisioned as an international community built bulwark against desertification borders are as old as human civilization and focal points for today's colliding forces of nationalism climate change globalization and mass migration the edge of the plain illuminates these lines of separation past and present how we define them and how they define us

Why Things Break

2021-02-18

did you know it took more than an iceberg to sink the titanic the challenger disaster was predicted unbreakable glass dinnerware had its origin in railroad lanterns a football team cannot lose momentum mercury thermometers are prohibited on airplanes for a crucial reason kryptonite bicycle locks are easily broken things fall apart is more than a poetic insight it is a fundamental property of the physical world why things break explores the fascinating question of what holds things together for a while what breaks them apart and why the answers have a direct bearing on our everyday lives when mark eberhart was growing up in the 1960s he learned that splitting an atom leads to a terrible explosion which prompted him to worry that when he cut into a stick of butter he would inadvertently unleash a nuclear cataclysm years later as a chemistry professor he remembered this childhood fear when he began to ponder the fact that we know more about how to split an atom than we do about how a pane of glass breaks in why things break eberhart leads us on a remarkable and entertaining exploration of all the cracks clefts fissures and faults examined in the field of materials science and the many astonishing discoveries that have been made about everything from the explosion of the space shuttle challenger to the crashing of your hard drive understanding why things break is crucial to modern life on every level from personal safety to macroeconomics but as eberhart reveals here it is also an area of cutting edge science that is as provocative as it is illuminating
