caise 2008wasthe20thinthe seriesofinternationalconferencesonadvanced information system engineering this edition continued the success of previous conferences a success largely due to that fact that since its rst edition this series has evolvedin parallelwith the evolutionofthe importance ofinformation systems in economic development caise has been able to follow and often to anticipate important changes that have occurred since 1978 when the rst caise conference was organized by arne sølvberg and janis bubenko in all these years modern businesses and it systems have been facing an ever more complex environment characterized by openness variety and change furthermore enterprises are experiencing ever more variety in their business in many dimensions in the same way the explosion of information technologies is overwhelming with a multitude of languages platforms devices standards and products thus enterprises need to manage an environment to monitor the interplay of changes in the business processes in information technologies and at the ontological level in order to achieve a sustainable development of their information systems enterprises must enter the era of sustainable information systems to face the important developmental challenges during all these years caise researchers have been challenged by all these changes andthecaiseconferencesprovideaforumforpresentinganddebating important scienti c results in fact caise is positioned at the core of these tumultuousprocesses hostingnewemergingideas fosteringinnovativeprocesses of design and evaluation developing new information technologies adapted to information systems creating new kinds of models but always being subject to rigorous scienti c selection

## **Conceptual Modeling for Novel Application Domains 2003-09-29**

Одним из ключевых направлений информатизации деятельности органов государственной власти является разработка и внедрение систем автоматизированной обработки электронных обращений заявлений жалоб предложений физических и юридических лиц поступающих на официальные веб сайты и порталы органов власти федеральных округов администраций областей и других территориальных образований Важную роль при решении данной задачи играет рубрицирование которое заключается в распределении обращений по тематическим рубрикам определяющих направления деятельности департаментов осуществляющих их обработку и подготовку соответствующего ответа Результаты анализа специфических особенности таких текстовых сообщений небольшой размер отсутствие разметки наличие ошибок нестационарность тезауруса и т п подтвердили невозможность применения традиционных подходов к рубрицированию и обосновали целесообразность

применения методов интеллектуального анализа данных В статье предложен новый подход к анализу и рубрицированию электронных неструктурированных текстовых документов поступающих на официальные веб сайты и порталы органов государственной власти Он предполагает формирование древовидной структуры рубричного поля основанной на нечетких отношениях различия между синтаксическими характеристиками документов Анализ основывается на определении нечеткого соответствия этих документов по синтаксическим характеристикам со значениями центров кластеров проводимого последовательно от корня к листьям построенного нечеткого дерева решений Предлагаемый метод рубрицирования программно реализован и апробирован при автоматизированной обработке и анализе обращений заявлений жалоб и предложений граждан поступающих в Администрацию Смоленской области Это позволило обеспечить оперативную и качественную актуализацию рубрик и анализ документов в условиях нестационарности состава тезауруса и значимости слов рубрик
