adaptation constitutes the driving force of contemporary culture with stories adapted across an array of media formats however adaptation studies has been concerned almost exclusively with textual analysis in particular with compare and contrast studies of individual novel and film pairings this has left almost completely unexamined crucial questions of how adaptations come to be made what are the industries with the greatest stake in making them and who the decision makers are in the adaptation process the adaptation industry re imagines adaptation not as an abstract process but as a material industry it presents the adaptation industry as a cultural economy of six interlocking institutions stakeholders and decision makers all engaged in the actual business of adapting texts authors agents publishers book prize committees scriptwriters and screen producers and distributors through trading in intellectual property rights to cultural works these six nodal points in the adaptation network are tightly interlinked with success for one party potentially auguring for success in other spheres but marked rivalries between these institutional forces also exist with competition characterizing every aspect of the adaptation process this book constructs an overdue sociology of contemporary literary adaptation never losing sight of the material and institutional dimensions of this powerful process

it is common practice nowadays for adaptation critics to denounce the lack of meta theoretical thinking in adaptation studies and to plead for a study of adaptation as adaptation one that eschews value judgments steps beyond normative fidelity based discourse examines adaptation from an intertextual perspective and abandons the single source model for a multiple source model this study looks into a research program that does all that and more it was developed in the late 1980s and presented in the early 1990s as a polysystem ps study of adaptations since then the ps label has been replaced with descriptive this book studies the question of whether and how a ps approach could evolve into a descriptive adaptation studies das approach although not perfect no method is das offers a number of assets apart from dealing with the above mentioned issues das transcends an auteurist approach and looks at explanation beyond the level of individual agency even if contextualized as an alternative to the endless accumulation of ad hoc case studies it suggests corpus based research into wider trends of adaptational behavior and the roles and functions of sets of adaptations das also allows reflection upon its own epistemic values it sheds new light on some old issues how can one define adaptation what does it mean to study adaptation as adaptation is equivalence still possible and is the concept still relevant das also tackles some deeper epistemological issues how can phenomena be compared why would difference be more real than sameness or change more real than stasis how does description relate to evaluation explanation and prediction etc this book addresses both theory minded scholars who are interested in epistemological reflection and practice oriented adaptation students who want to get started from a theoretical point of view it discusses arguments that could support the legitimacy of adaptation studies as an academic discipline from a practical point of view it explains in general terms ways of conducting an adaptation study patrick cattysse s work is of utmost importance to adaptation studies as the first extended attempt to develop a rigorous methodology which borrows in very meaningful ways from adaptation studies cousin translation studies this book should be on every adaptation scholar s shelf while hutcheons sanders and leitch to name but a few laid the groundwork which allowed adaptation studies to establish itself as a

field of inquiry in its own right cattryse moves the field into the next necessary stage that of developing conceptual tools which stand the test of critical investigation and allow adaptation studies to move beyond the single case study approach katja krebs university of bristol this book is a bold initiative it proposes and illustrates a comprehensive new empirical research programme for film adaptation studies inspired by the way systems theory and norm theory have expanded translation studies one of the book s unusual strengths is the way the proposal is grounded in a thoughtful theoretical discussion of conceptual and methodological issues dealing with such notions as theory descriptivism definition diachrony and explanation this gives the work a significance that ranges well beyond adaptation studies alone it deserves the attention of scholars in the humanities in general andrew chesterman university of helsinki this dense and theoretically informed study argues forcefully for a descriptive systems analysis approach to literature film adaptation building on the author s earlier corpus based study of film noir and adaptation providing a wide ranging discussion of important critical questions including the place of logical positivism in humanistic studies this book will give adaptation scholars much to think about well written carefully organized and consistently persuasive descriptive adaptation studies promises to be an important intervention in a field of increasing importance in humanistic studies must reading for scholars in the field r barton palmer clemson university

A Theory of Adaptation 2012-08-21

most books on film adaptation the relation between films and their literary sources focus on a series of close one to one comparisons between specific films and canonical novels this volume identifies and investigates a far wider array of problems posed by the process of adaptation beginning with an examination of why adaptation study has so often supported the institution of literature rather than fostering the practice of literacy thomas leitch considers how the creators of short silent films attempted to give them the weight of literature what sorts of fidelity are possible in an adaptation of sacred scripture what it means for an adaptation to pose as an introduction to rather than a transcription of a literary classic and why and how some films have sought impossibly close fidelity to their sources after examining the surprisingly divergent fidelity claims made by three different kinds of canonical adaptations leitch s analysis moves beyond literary sources to consider why a small number of adapters have risen to the status of auteurs and how illustrated books comic strips video games and true stories have been adapted to the screen the range of films studied from silent shakespeare to sherlock holmes to the lord of the rings is as broad as the problems that come under review

The Bloomsbury Introduction to Adaptation Studies **2016-02-25**

this book provides a pioneering and provocative exploration of the rich synergies between adaptation studies and translation studies and is the first genuine attempt to discuss the rather loose usage of the concepts of translation and adaptation in terms of theatre and film at the heart of this collection is the proposition that translation studies and adaptation studies have much to offer each other in practical and theoretical terms and can no longer exist independently from one another as a result it generates productive ideas within the contact zone between these two fields of study both through new theoretical paradigms and detailed case studies such closely intertwined areas as translation and adaptation need to encounter each other s methodologies and perspectives in order to develop ever more rigorous approaches to the study of adaptation and translation phenomena challenging current assumptions and prejudices in terms of both the book includes contributions as diverse yet interrelated as bakhtin s notion of translation and adaptation bollywood adaptations of shakespeare s othello and an analysis of performance practice itself arguably an adaptive practice which uses a variety of languages from english and greek to british and international sign language as translation and adaptation practices are an integral part of global cultural and political activities and agendas it is ever more important to study such occurrences of rewriting and reshaping by exploring and investigating interdisciplinary and cross cultural perspectives and approaches this volume investigates the impact such occurrences of rewriting have on the constructions and experiences of cultures while at the same time developing a rigorous methodological framework which will form the basis of future scholarship on performance and film translation and adaptation
