in text they become unfamiliar and revealing new dimensions emerge impartial reportage is revealed to be laced with subjectivity bias mystery second guessing and in many cases white knuckled fear part nostalgia part myth these words render pivotal moments in american history through the communal lens of media

In Search of Moral Knowledge 2014-05-02 using clear readable prose conceptual artist and poet kenneth goldsmith s manifesto shows how our time on the internet is not really wasted but is quite productive and creative as he puts the experience in its proper

theoretical and philosophical context kenneth goldsmith wants you to rethink the internet many people feel guilty after spending hours watching cat videos or clicking link after link after link but goldsmith sees that wasted time differently unlike old media the internet demands active engagement and it s actually making us more social more creative even more productive when goldsmith a renowned conceptual artist and poet introduced a class at the university of pennsylvania called wasting time on the internet he nearly broke the internet the new yorker the atlantic the washington post slate vice time cnn the telegraph and many more ran articles expressing their shock dismay and ultimately their curiosity goldsmith s ideas struck a nerve because they are brilliantly subversive and endlessly shareable in wasting time on the internet goldsmith expands upon his provocative insights contending that our digital lives are remaking human experience when we re wasting time we re actually creating a culture of collaboration we re reading and writing more and quite differently and we re turning concepts of authority and authenticity upside down the internet puts us in a state between deep focus and subconscious flow a state that goldsmith argues is ideal for creativity where that creativity takes us will be one of the stories of the twenty first century wide ranging counterintuitive engrossing unpredictable like the internet itself wasting time on the internet is the manifesto you didn t know you needed *Against War* 2008-04-09 natural law theory is controversial today because it presumes that there is a stable human nature that is subject to a law how do we know that human nature is stable and not ever evolving how can we expect law not to constrict human freedom and

potential furthermore if there is a law there must be a lawgiver matthew levering argues that natural law theory makes sense only within a broader worldview and that the bible sketches both such a persuasive worldview and an account of natural law that offers an exciting portrait of the moral life to establish the relevance of biblical readings to the wider philosophical debate on natural law this study offers an overview of modern natural law theories from cicero to nietzsche which reverse the biblical portrait by placing human beings at the center of the moral universe whereas the biblical portrait of natural law is other directed ordered to self giving love the modern accounts turn inward upon the self drawing on the thought of st thomas aquinas levering employs theological and philosophical investigation to achieve a contemporary doctrine of natural law that accords with the biblical witness to a loving creator who draws human beings to share in the divine life this book provides both an introduction to natural law theory and a compelling challenge to re think current biblical scholarship on the topic

Seven American Deaths and Disasters 2013-03-12 the natural law reader features a selection of readings in metaphysics jurisprudence politics and ethics that are all related to the classical natural law tradition in the modern world features a concise presentation of the natural law position that offers the reader a focal point for discussion of ancient and contemporary ideas in the natural law tradition draws upon the metaphysical and ethical categories put forth and developed by aristotle and aquinas points to the historical significance and contemporary relevance of the natural law tradition reflects on a revival of

interest in the tradition of virtue ethics and human rights

Philosophical Papers 1980-03-31 rationality and religious commitment shows how religious commitment can be rational and describes the place of faith in the postmodern world it portrays religious commitment as far more than accepting doctrines it is viewed as a kind of life not just as an embrace of tenets faith is conceived as a unique attitude it is irreducible to belief but closely connected with both belief and conduct and intimately related to life's moral political and aesthetic dimensions part one presents an account of rationality as a status attainable by mature religious people even those with a strongly scientific habit of mind part two describes what it means to have faith how faith is connected with attitudes emotions and conduct and how religious experience may support it part three turns to religious commitment and moral obligation and to the relation between religion and politics it shows how ethics and religion can be mutually supportive even though ethics provides standards of conduct independently of theology it also depicts the integrated life possible for the religiously committed a life with rewarding interactions between faith and reason religion and science and the aesthetic and the spiritual the book concludes with two major accounts one explains how moral wrongs and natural disasters are possible under god conceived as having the knowledge power and goodness that make such evils so difficult to understand the other account explores the nature of persons human and divine and yields a conception that can sustain a rational theistic worldview even in the contemporary scientific age
