ethics and economics is divided in two parts in the first one italian and french catholic thinkers are analysed by well known scholars with basic reference to the economic view of their work in the second part the economic environment is described and proposals based on the social catholic thought for the solution of the most diffused economic problems are given the book therefore furnishes an alternative approach to the orthodox economic analysis and for this reason it may be a useful tool for researchers who wish to compare their theoretical approach with a less conventional one and for scholars who want to examine closely alternative views to the traditional economic models and paradigm

questo volume che inaugura la pubblicazione in formato elettronico delle opere complete di bruno leoni include tutte le 408 recensioni scritte per la rivista il politico nel corso di un decennio 1950 1959 a sorprendere non è soltanto l'elevato numero di recensioni ma anche la diversità degli argomenti trattati dalla psichiatria all'arte dalla religione alla letteratura dall'archeologia alle civiltà orientali dalla storia all'architettura oltre naturalmente alla politica all'economia e al diritto si tratta di un testo utile per due motivi in particolare da un lato per capire meglio il pensiero di leoni poiché in queste recensioni i suoi riferimenti culturali vengono esplicitati e si chiarisce bene quale fosse la sua concezione della politica della filosofia e della società dall'altro esso consente di farsi un'idea sugli argomenti di cui non si discuteva in italia negli anni cinquanta il politico fondato dallo stesso leoni nel 1950 fu infatti un mirabile tentativo di innovare la cultura italiana e in queste recensioni che sono per la maggior parte di libri stranieri l'autore suggerisce traduzioni e propone idee e argomenti in italia allora poco conosciuti o spesso conosciuti male le recensioni non sono mai banali e anzi vi emerge con chiarezza quali siano le valutazioni le idee e in generale il pensiero di leoni fare esplorazioni in campi così diversi e saperne trarre vantaggio nell'elaborazione di idee nel proprio settore di ricerca richiede indubbiamente un'intelligenza e una cultura fuori dall'ordinario ma questo era il suo approccio metodologico le scienze umane gli apparivano intimamente connesse e solo da una loro trattazione comune era convinto di poter trovare la soluzione ai problemi sociali

the book tries to identify the main contours of unjusticiability and non justiciability from an historical and comparative perspective distinguishing between common law world and civil law tradition in the light of a general overview the aim of this publication is to reflect on the utility of paving the way for a much wider approach to unjusticiability more precisely some scholars have recently suggested that such a notion could embrace all the situations where a court does not decide a case so that it is impossible for the plaintiff to have the case decided by a court a first category covers the situations where the court refuses to judge because it does not want to judge a second category is related to all the cases where there is an impossibility to reach a decision any case where the judge cannot or does not wish to make justice si iudex non facit iustitiam continues to indicate a series of new and old questions

Rodrigo Pérez de Arce's essay 'Urban Transformations and Architectural Additions' was published during the formative stages of post-modernism at the point where theory was becoming seriously established. Jencks' first essays formalising the term post-modernism in architecture and the revised 'Learning from Las Vegas' were published the previous year. In planning terms, modernism had become associated with comprehensive redevelopment and forms of urban organisation that ignored context, history and any sense of tradition. De Arce considered the essential nature of buildings and the richness of historic urban form and explored how robust that essence was over time. He looked at the value of essential remnants and rich complexities in maintaining a sense of continuity and relevance, having explored the adaptation process in history. De Arce went on to see how such a process might be simulated in contemporary cities with modern buildings using additions and layers to change them from objects in infinite windswept space to being part of a rich urban fabric which described urban place. To do this he used concrete examples: housing schemes by James Stirling, new government centres in Chandigarh and Dacca, and more prosaic 1960s housing blocks. The paper had a fundamental influence on the way that architects and planners thought about the nature of cities as dynamic organisms that were tangible to human beings, completely opposite to the systems thinking of the time. It contributed to ideas about the importance of street place and city block which influenced so much recent regeneration practice as we enter a phase of development where the reuse and adaptation of existing buildings is becoming paramount from both an economic and sustainable point of view. Pérez de Arce's paper gives important insights into how to think about the process positively.

Most of the papers collected in this volume concentrate on the history of linguistic ideas in France and Italy in the modern period from the Renaissance to the present day. Some of them are specifically focused on the links between the two traditions of reflection on language. The contributions have a common methodological outlook: the authors do not believe that the history of linguistic ideas is a separate activity from research on language or that it is marginal with respect to the latter. On the contrary, they are convinced that in contemporary research into language we can still discern the influence, positive or negative, as this may be of factors deriving from the sometimes distant past. A historical analysis of these factors, whether it rejects them as superseded or redefines them in order to elicit the fruitful suggestions they may still contain, has a contribution to make to the progress of theory.

in his book sándor agócs explores the conflicts that accompanied the emergence of the italian catholic labor movement he examines the ideologies that were at work and details the organizational forms they inspired during the formative years of the italian labor movement neo thomism became the official ideology of the church church leadership drew upon the central thomistic principal of caritas christian love in its response to the social climate in italy which had become increasingly charged with class consciousness and conflict aquinas s principles ruled out class struggle as contrary to the spirit of christianity and called for a symbiotic relationship among the various social strata neo thomistic philosophy also emphasized the social functions of property a principle that demanded the paternalistic care and tutelage of the interests of working people by the wealthy in applying these principles to the nascent labor movement the church s leadership called for a mixed union misto whose membership would include both capitalists and workers they argued that this type of union best reflected the tenets of neo thomistic social philosophy in addition through its insistence on the misto the church was also motivated by an obsessive concern with socialism which it viewed as a threat and by a fear of the working classes which it associated with socialism which it viewed as a threat and by a fear of the working classes which it associated with socialism in pressing for the mixed union therefore the church leadership hoped not only to realize neo thomistic principles but also to defuse class struggle and prevent the proletariat from becoming a viable social and political force catholic activists who were called upon to put ideas into practice and confronted social realities daily learned that the mixed unions were a utopian vision that could not be realized they knew that the age of paternalism was over and that neither the workers nor the capitalists were interested in the mixed union in its stead the activists urged for the simple union an organization for workers only the conflict which ensued pitted the bourgeoisie and the catholic hierarchy against the young activists sándor agócs reveals precisely in what way catholic social thought was inadequate to deal with the realities of unionization and why catholics were unable to present a reasonable alternative
