TDL 2015-2016 Catalogue 2018-12-31 this book constitutes revised selected papers from the workshops held at 24th international conference on parallel and distributed computing euro par 2018 which took place in turin italy in august 2018 the 64 full papers presented in this volume were carefully reviewed and selected from 109 submissions euro par is an annual international conference in europe covering all aspects of parallel and distributed processing these range from theory to practice from small to the largest parallel and distributed systems and infrastructures from fundamental computational problems to full edged applications from architecture compiler language and interface design and implementation to tools support infrastructures and application performance aspects

Euro-Par 2018: Parallel Processing Workshops 2007 in this thesis the error resilient transmission of h 264 compressed video using context based adaptive binary arithmetic code cabac as the entropy code is examined the h 264 compressed video is convolutionally encoded and transmitted over an additive white gaussian noise awgn channel two iterative joint source channel decoding schemes are proposed in which slice candidates that failed semantic verification are exploited the first proposed scheme uses soft values of bits produced by a soft input soft output channel decoder to generate a list of slice candidates for each slice in the compressed video sequence these slice candidates are semantically verified to choose the best one a new semantic checking method is proposed which uses information from slice candidates that failed semantic verification to virtually check the current slice candidate the second proposed scheme is built on the first one this scheme also uses slice candidates that failed semantic verification but it uses them to modify soft values of bits at the source decoder before they are fed back into the channel decoder for the next iteration simulation results show that both schemes offer improvements in terms of subjective quality and in terms of objective quality using psnr and ber as measures keywords video transmission h 264 semantics slice candidate joint source channel decoding error resiliency

Global Sources Electronics 2010 this revision of the classic book on cctv technology cctv surveillance provides a comprehensive examination of cctv covering the applications of various systems how to design and install a system and how to choose the right hardware taking into account the ever changing advances in technology using digital techniques and the internet cctv surveillance second edition is completely updated with the recent advancements in digital cameras and digital recorders remote monitoring via the internet and cctv integration with other security systems continuing in the celebrated tradition of the first edition the second edition is written to serve as a useful resource for the end user as well as the technical practitioner each chapter begins with an overview and presents the latest information on the relevant equipment describing the characteristics features and application of each device coverage of aging or obsolete technology is reduced to a historical perspective and eight brand new chapters cover digital video technology multiplexers integrated camera lens housing smart domes and rapid deployment cctv systems serves as an indispensable resource on cctv theory includes eight new chapters on the use of digital components and other related technologies that have seen a recent explosion in use fully illustrated the book contains completely updated photographs and diagrams that represent the latest in cctv technology advancements

Iterative Joint Source Channel Decoding for H.264 Compressed Video Transmission 2005 this international bestseller and essential reference is the bible for digital video engineers and programmers worldwide this is by far the most informative analog and digital video reference available includes the hottest new trends and cutting edge developments in the field video demystified fourth edition is a one stop reference guide for the various digital video technologies the fourth edition is completely updated with all new chapters on mpeg 4 h 264 sdtv hdtv atsc dvb and streaming video video over dsl ethernet etc as well as discussions of the latest standards throughout the accompanying cd rom is updated to include a unique set of video test files in the newest formats

Asian Sources Electronics 2011-03-15 innovation studies have long been confined to the theoretical system established by the scholars of developed countries in the west it is difficult to use these studies to understand the real nature and law of technological innovation in developing countries this book in an innovative manner studies the theoretical system of

secondary innovation and reveals the evolution law and dynamic innovation mode of the activities carried out by technologically backward countries it does so by laying an important foundation for the development of management science theory on the basis of the standpoint and characteristics of developing countries

CCTV Surveillance 2005 for over fifty years we at speco technologies have dedicated ourselves to providing the latest innovations in video surveillance and electronic accessories as well as the highest quality audio products for residential and commercial use we have committed ourselves to providing affordable dependable merchandise delivering exceptional customer service and offering extensive product training technical and marketing support we want our customers to grow with us and move forward

Video Demystified 2020-12-17 with near universal internet access and ever advancing electronic devices the ability to facilitate interactions between various hardware and software provides endless possibilities though internet of things iot technology is becoming more popular among individual users and companies more potential applications of this technology are being sought every day there is a need for studies and reviews that discuss the methodologies concepts and possible problems of a technology that requires little or no human interaction between systems the handbook of research on the internet of things applications in robotics and automation is a pivotal reference source on the methods and uses of advancing iot technology while highlighting topics including traffic information systems home security and automatic parking this book is ideally designed for network analysts telecommunication system designers engineers academicians technology specialists practitioners researchers students and software developers seeking current research on the trends and functions of this life changing technology

Global Manufacturing And Secondary Innovation In China: Latecomer's Advantages 2015 digital video is everywhere the engineers creating hdtv mp3 players and smart phones and their components are in need of essential information at a moment s notice the instant access series provides all the critical content that a digital video engineer needs in his or her daily work this book provides an introduction to video as well as succinct overviews of analog and digital interfaces along with signal processing this book is filled with images figures tables and easy to find tips and tricks for the engineer that needs material fast to complete projects to deadline tips and tricks feature that will help engineers get up and running fast and move on to the next issue easily searchable content complete with tabs chapter table of contents bulleted lists and boxed features just the essentials no need to page through material not needed for the current project

FCC Record 2014-02-26 understanding the latest capabilities in the cyber threat landscape as well as the cyber forensic challenges and approaches is the best way users and organizations can prepare for potential negative events adopting an experiential learning approach this book describes how cyber forensics researchers educators and practitioners can keep pace with technological advances and acquire the essential knowledge and skills ranging from iot forensics malware analysis and cctv and cloud forensics to network forensics and financial investigations given the growing importance of incident response and cyber forensics in our digitalized society this book will be of interest and relevance to researchers educators and practitioners in the field as well as students wanting to learn about cyber forensics

Clearly Different Video Surveillance Solutions 2019-09-13 it is impossible to imagine the modern world without sensors or without real time information about almost everything from local temperature to material composition and health parameters we sense measure and process data and act accordingly all the time in fact real time monitoring and information is key to a successful business an assistant in life saving decisions that healthcare professionals make and a tool in research that could revolutionize the future to ensure that sensors address the rapidly developing needs of various areas of our lives and activities scientists researchers manufacturers and end users have established an efficient dialogue so that the newest technological achievements in all aspects of real time sensing can be implemented for the benefit of the wider community this book documents some of the results of such a dialogue and reports on advances in sensors and sensor systems for existing and emerging real time monitoring applications

Handbook of Research on the Internet of Things Applications in Robotics and Automation 2008-10-07 this book constitutes the refereed proceedings of the 8th international conference

on ubiquitous intelligence and computing uic 2010 held in banff canada september 2011 the 44 papers presented together with two keynote speeches were carefully reviewed and selected from numerous submissions the papers address all current issues in smart systems and services smart objects and environments cloud and services computing security privacy and trustworthy p2p wsn and ad hoc networks and ubiquitous intelligent algorithms and applications
