computer science based on feedback from extensive classroom experience the book has been carefully structured in order to make teaching more natural and effective slides and additional exercises with solutions for lecturers are also available through the book s supporting website to help course instructors prepare their lectures the design of school curriculums involves deep thought about the nature of knowledge and its value to learners and society it is a serious responsibility that raises a number of questions what is knowledge for what knowledge is important for children to learn how do we decide what knowledge matters in each school subject and how far should the knowledge we teach in school be related to academic disciplinary knowledge these and many other questions are taken up in what should schools teach the blurring of distinctions between pedagogy and curriculum and between experience and knowledge has served up a confusing message for teachers about the part that each plays in the education of children schools teach through subjects but there is little consensus about what constitutes a subject and what they are for this book aims to dispel confusion through a robust rationale for what schools should teach that offers key understanding to teachers of the relationship between knowledge what to teach and their own pedagogy how to teach and how both need to be informed by values of intellectual freedom and autonomy this second edition includes new chapters on chemistry drama music and religious education and an updated chapter on biology a revised introduction reflects on emerging discourse around decolonizing the curriculum and on the relationship between the knowledge that children encounter at school and in their homes readings in the theory of religion brings together classic and contemporary texts to promote new ways of thinking about religion the texts reflect the diverse methods used in the study of religion text and textuality ritual the body gender and sexuality religion and race religion and colonialism and methodological and theoretical issues in the study of religion readings in the theory of religion is an indispensable introduction to theoretical and interdisciplinary approaches in religious studies and provides the student with all the tools needed to understand this fascinating and wide ranging field with this influential book of essays jonathan z smith has pointed the academic study of religion in a new theoretical direction one neither theological nor willfully ideological making use of examples as apparently diverse and exotic as the maori cults in nineteenth century new zealand and the events of jonestown smith shows that religion must be construed as conventional anthropological historical and as an exercise of imagination in his analyses religion emerges as the product of historically and geographically situated human ingenuity cognition and curiosity simply put as the result of human labor one of the decisive but wholly ordinary ways human beings create the worlds in which they live and make sense of them these seven essays display the critical intelligence creativity and sheer common sense that make smith one of the most methodologically sophisticated and suggestive historians of religion writing today smith scrutinizes the fundamental problems of taxonomy and comparison in religious studies suggestively redescribes such basic categories as canon and ritual and shows how frequently studied myths may more likely reflect situational incongruities than vaunted mimetic congruities his final essay on jonestown demonstrates the interpretive power of the historian of religion to render intelligible that in our own day which seems most bizarre richard s sarason is not much connective tissue between the former who often serve as shorthand for a persistent religious fanaticism in the united states and the almost one quarter of the population who now regularly check the none or none of the above box when responding to surveys of religious preference but instead of seeing a disconnect between these two groups separated by time historian catherine albanese insists there is a deep connection that spans the centuries with a targeted romp through american history from the seventeenth century to the present albanese ties together these seemingly disparate groups through a shared and distinctively american preoccupation with delight and desire albanese begins our journey with the role of delight and desire in the brand of calvinism championed by renowned puritan minister cotton mather and later jonathan edwards she then traces the development of these themes up through the present treating the reader to revelatory readings of ralph waldo confronting tensions that are timeless and ubiquitous illustrated the savage and modern self examines the representations of north american indians in novels poetry plays and material culture from eighteenth century britain author robbie richardson argues that depictions of indians in british literature were used to critique and articulate evolving ideas about consumerism colonialism britishness and ultimately the modern self over the course of the century considering the ways in which british writers represented contact between britons and indians both at home and abroad the author shows how these sites of contact moved from a self-affirmation of british authority earlier in the century to a mutual corruption to a desire to appropriate perceived traits of indianess looking at texts exclusively produced in britain the savage and modern self reveals that the modern finds definition through imagined scenes of cultural contact by the end of the century richardson concludes the hybrid indian briton emerging in literature and visual culture exemplifies a form of modern british masculinity colonial narratives cultural dialogues demonstrates the continuing validity of the colonial paradigm as it maps the geographical political and imaginative space of india indies from the seventeenth century to the present breaking new ground in postcolonial studies jyotsna singh highlights the interconnections among early modern colonial encounters later manifestations in the raj and their lingering influence in the postcolonial indian nationalist state singh challenges the assumption of eye witness accounts and unmediated experiences implicit in colonial representational practices and often left unchallenged in the postcolonial era essential introductory
