alexander dugin s the theory of a multipolar world is a cheerful and optimistic view of a future in which humanity will reach its highest development however it will not be the uniform humanity pictured by the globalizing and leveling schemers and manipulators instead old artificial borders will be dissolved and new natural divisions installed mankind will blossom in its manifold manifestations namely the distinct civilizations and the ethnoses that breathe their souls into them drawing from a variety of philosophies from both the right and left dugin maps out the immediate goals and ultimate vision of this theory and what is required to implement it multipolarity is the tapestry that

creates a myriad of colorful potentialities rather than a single dead end passage whither an anonymous human mass is herded to languish till the end of days according to dugin the westphalian system of the sovereignty of nation states has long since become obsolete and ceased to function in its place will be erected a continental system of large spaces in the schmittian sense where individuals are integrated in the social whole based on the insoluble bond of kinship and common tradition it will be a time of high adventure boundless curiosity and the rediscovery of what it truly means to be different and therefore able to think of unique solutions in lieu of standardized ones

the political economy of lula s brazil describes the social political and economic transformations that led to increased interest in the tropical giant at the start of the 21st century this volume demonstrates that brazil s rise was the result of the adoption of heterodox economic policies while also highlighting the obstacles to choosing an egalitarian development path in latin america adopting an innovative perspective in terms of methodology and interpretation contributors from brazil latin america and france follow a non dogmatic critical approach in order to explain the institutional changes that made a new cycle of development possible in brazil the authors also argue that the evolution of brazil following the implementation of leftist policies paradoxically gave birth to several economic political and environmental contradictions they contend that these contradictions including the

falling rate of profit linked to the full employment of resources the redistributive process seen as a menace by the conservative middle classes and the growing intervention of the state in the different markets eventually led to the end of the early 21st century development cycle providing clues to understanding the contradictory and painful path towards the development of semi industrialised countries this book will interest students and academics in the fields of economics sociology history and political science the story it tells may also interest all those searching for independent analysis of the successes and failures of lula s brazil
