Case Studies and Theory Development in the Social Sciences

2005-04-15

the use of case studies to build and test theories in political science and the other social sciences has increased in recent years many scholars have argued that the social sciences rely too heavily on quantitative research and formal models and have attempted to develop and refine rigorous methods for using case studies this text presents a comprehensive analysis of research methods using case studies and examines the place of case studies in social science methodology it argues that case studies statistical methods and formal models are complementary rather than competitive the book explains how to design case study research that will produce results useful to policymakers and emphasizes the importance of developing policy relevant theories it offers three major contributions to case study methodology an emphasis on the importance of within case analysis a detailed discussion of process tracing and development of the concept of typological theories case studies and theory development in the social sciences will be particularly useful to graduate students and scholars in social science methodology and the philosophy of science as well as to those designing new research projects and will contribute greatly to the broader debate about scientific methods
