Examining Young Learners: Research and Practice in Assessing the English of School-age Learners

2018-06-28 self regulated learning is one of the phenomena which is seen as highly important for successful student academic performance it is considered to be one of the key components for achieving academic success by the students which has become topical in recent years in higher education however most studies on self regulated learning have been prepared in the tradition more specifically focused at its mechanisms types etc although self regulated learning as a topic is far from being new the studies specifically placing self regulated learning in the context of its cognitive and metacognitive aspects perspective are rarer the aim of this book is to precisely further explore this perspective using theoretical and empirical data from various sources all over the globe the contribution of this book deals with a broad range of issues concerning self regulated learning cognition and metacognition however this book deals not only with the theoretical research of the

various aspects of self regulated learning other intriguing issues have also been examined such as why self regulated learning is so effective its linkage with cognitive psychology research developmental trends of adolescents learning strategies and academic motivation in relation to age and gender self regulatory climate in college math labs metacognitive self regulated models in math learning for students with special needs cognitive and metacognitive strategy use in reading students goals motivation and self initiated actions for improving english and delivery skills for oral presentations self regulated cognitive and metacognitive learning strategy use and access to online learning activities to university students academic success in a blended context etc qualitative and quantitative approaches to the research have produced better insight and deeper understanding of the students goals and motives as well as attitudes and differences in their academic achievements some of the chapters in this book present the empirical results of in depth interviews discussions and participant observation i hope that my contribution in this book will advance our understanding of the variety in cognitive and metacognitive aspects of self regulated learning the differences between the attitudes and genders the impact of cognition and metacognition on self regulated learning of students and their academic excellence i also hope that this book will contribute to further recognition of self regulated learning as an interesting and important topic for further scientific research i wish to thank to all those who have contributed to the preparation of this book as editor i invited scholars from different disciplines and countries to prepare their contributions in order to get the broadest possible overview of the current status of knowledge in the sphere of self regulated learning its connection with cognition and metacognition i believe that the resulting variation has been properly reflected in this book i thank all the authors not only for their contribution but also for their accuracy during the preparation of the appropriate chapters
