read search and listen to the entire collections of the writings of watchman nee and witness lee bookmark annotate and view referenced scripture reading to assist study of the ministry of these servants of the lord the life study of the bible a monumental and classic work by witness lee builds upon and is a further development of all that the lord has revealed to his church in the past centuries it is filled with the revelation concerning the processed triune god the living christ the life giving spirit the experience of life and the definition and what is it that defines life how can we tell that one thing is alive and another is not most people have an intuitive understanding of what it means for something to be alive however it s surprisingly hard to come up with a precise definition of life the study of life biology is a natural science concerned with the study of life and living organisms modern biology is a vast and eclectic field composed of many specialized disciplines that study the structure function growth distribution evolution or other features of living organisms biology is the study of life the word biology is derived from the greek words bios meaning life and logos meaning study in general biologists study the structure function biology is the study of life and living things through rigorously tested and peer reviewed scientific research methods 1 2 the science of biology scientific reasoning science is knowledge obtained from logical inferences and deductive experimentation that attempts to comprehend nature 1 1 the study of life 1 1 2 the science of biology expand collapse global location 1 1 2 the science of biology page id openstax learning objectives by the end of this section you will be able to do the following identify the shared characteristics of the natural sciences summarize the steps of the scientific method updated on may 05 2019 what is biology simply put it is the study of life in all of its grandeur biology concerns all life forms from the very small algae to the very large elephant but how do we know if something is living for example is a virus alive or dead biology study of living things and their vital processes that deals with all the physicochemical aspects of life modern principles of other fields such as chemistry medicine and physics for example are integrated with those of biology in areas such as biochemistry biomedicine and biophysics the phenomenon of life can be approached in several ways life as it is known and studied on planet earth life imaginable in principle and life by hypothesis that might exist elsewhere in the universe see extraterrestrial life as far as is known life exists only on earth study guide learn objectives identify the core characteristics that define life identify the commonalities and differences among various definitions of life discuss the challenges of settling on a single definition of life key concepts and terms order sensitivity to stimuli reproduction homeostasis adaptation evolution chapter outline 1 1 the study of biology 1 2 themes and concepts of biology introduction viewed from space earth offers no clues about the diversity of life forms that reside there the first forms of life on earth are thought to have been microorganisms that existed for billions of years in the ocean before plants and animals appeared when the topic of the meaning of life comes up people tend to pose one of three questions what are you talking about what is the meaning of life and is life in fact meaningful biology or biological sciences is the study of life divided into focused subfields that study the structure function anatomy origin and distribution of living organisms the word scientists believe that the first forms of life on earth were microorganisms that existed for billions of years in the ocean before plants and animals appeared the mammals birds and flowers so familiar to us are all relatively recent originating 130 to 250 million years ago a 30 minute radio broadcast composed of excerpts from witness lee s spoken ministry listen to programs read life studies get today s broadcast about life study of the bible with witness lee the study involved 138 organizations from 27 countries and used 15 times more data than any previous comparable study of the flowering plant tree of life some of this data came from dried and forget green purple may be key to finding planets capable of hosting alien life study says it s likely for astronomers combing the cosmos for signs of extraterrestrial life to stumble upon a 1 1 1 introduction the first forms of life on earth are thought to have been microorganisms that existed for billions of years in the ocean before plants and animals appeared the mammals birds and flowers so familiar to us are all relatively recent originating 130 to 200 million years ago international study produces a comprehensive tree of life for flowering plants time calibrated phylogenetic tree for angiosperms based on 353 nuclear genes all 64 orders all 416 families and
