the co host of the popular npr podcast planet money provides a well researched entertaining somewhat irreverent look at how money is a made up thing that has evolved over time to suit humanity's changing needs money only works because we all

~~agree to believe in it in money jacob goldstein~~

shows how money is a useful fiction that has shaped societies for thousands of years from the rise of coins in ancient greece to the first stock market in amsterdam to the emergence of shadow banking in the 21st century at the heart of the story are the fringe thinkers and world leaders who reimagined money kublai khan the mongol emperor created paper money backed by nothing centuries before it appeared in the west john law a professional gambler and convicted murderer brought modern money to france and destroyed the country's economy the cypherpunks a group of radical libertarian computer programmers paved the way for bitcoin one thing they all realized what counts as money and what doesn't is the result of choices we make and those choices have a profound effect on who gets more stuff and who gets less who gets to take risks when times are good and who gets screwed when things go bad lively accessible and full of interesting details like the 43 pound copper coins that 17th century swedes carried strapped to their backs money is the story of the choices that gave us money as we know it today

Money 2020-09-08

how happy would you be if you had all the money in the world the universal lament about money is that there is never enough we spend endless hours obsessing over our budgets and investments trying to figure out ways to stretch every dollar we try to follow the advice of money gurus and financial planners then kick ourselves whenever we spend too

~~much or save too little for all of the stress and~~
effort we put into every choice why are most of us
unhappy about our finances according to laura
vanderkam the key is to change your perspective
instead of looking at money as a scarce resource
consider it a tool that you can use creatively to
build a better life for yourself and the people
you care about for instance the average couple
spends 5 000 on engagement and wedding rings
making these pricey purchases largely because
everyone else does but what if you decided to
spend 300 on rings and apply the rest to future
date nights weekend getaways and thinking of you
bouquets over the next ten years in the long run
what would bring more joy to your marriage
likewise will owning a home with a pristine lawn
and a two car garage the american dream really
make you more satisfied or are you saving up for
this investment just because financial planners
tell you it's worth it vanderkam shows how each of
us can figure out better ways to use what we have
to build the lives we want drawing on the latest
happiness research as well as the stories of
dozens of real people vanderkam offers a
contrarian approach that forces us to examine our
own beliefs goals and values among her advice
laugh at the joneses it's human nature to compare
yourself to those around you but you can create
lifestyle that rings your personal satisfaction
without copying your neighbors give yourself the
best weekend ever studies show that experiences
often bring more pleasure than material goods with
a little planning and creativity you can give
yourself a memorable getaway without leaving town

the new york times bestseller from business journalist christopher leonard infiltrates one of america s most mysterious institutions the federal reserve to show how its policies spearheaded by chairman jerome powell over the past ten years have accelerated income inequality and put our country s economic stability at risk if you asked most people what forces led to today s unprecedented income inequality and financial crashes no one would say the federal reserve for most of its history the fed has enjoyed the fawning adoration of the press when the economy grew it was credited to the fed when the economy imploded in 2008 the fed got credit for rescuing us but here for the first time is the inside story of how the fed has reshaped the american economy for the worse it all started on november 3 2010 when the fed began a radical intervention called quantitative easing in just a few short years the fed more than quadrupled the money supply with one goal to encourage banks and other investors to extend more risky debt leaders at the fed knew that they were undertaking a bold experiment that would produce few real jobs with long term risks that were hard to measure but the fed proceeded anyway and then found itself trapped once it
