about the book the book how to write a research paper guide book for neophyte students
2023-02-21 **12/18** integrating educational technology into teaching chapter 1

composed by three youngsters dr rashmee yadav dr brij vikash singh and dr mithesh verma is a fantastic effort in this direction they have covered almost all the areas of research paper writing process and how to write a research paper etc the book is based on the research paper writing process the author s main focused on this book how to write a research paper guide book for the neophyte students this book is helpful to students writing research paper in proper way because plenty of research papers are written every year but in many of them research methodology aspect is not given a considerable attention and because of which the research papers end up in just being endless words containing stories leading to less or no sense it should be noted that the quality in research articles comes from the extensive planning and in depth research before starting writing them actually this is true even for management research papers writing a research paper analyzes a perspective or argues a point regardless of the type of research paper the researcher is writing the researcher should present his own thinking backed up by others ideas and information research paper as a result of the research in the teaching of writing discussions with colleagues and own experiences we have developed a detailed approach to writing research papers and the approach is presented here instead of focusing on one research paper we have focused on the process of research writing through a series of shorter writing exercises students begin by having to carefully think about a topic of research and by developing a working idea they then write a series of shorter essays that explore that topic all along the way students are continuing to research and revise their working proposal so that by the end of the term their thinking about their original topic of research has evolved this b

writing high quality papers suitable for publication within international scientific journals is now an essential skill for all early career researchers their career progression and the reputation of the department in which they work depends upon it however many manuscripts are rejected or sent back for major re working not because the science they contain is in any way bad but because the same problems keep occurring in the way that the material is presented it is one thing to write a good scientific paper however it is quite another thing to get it published this requires some additional nous in writing this book don harris draws upon nearly a quarter of a century of experience as an author and reviewer of research papers and ultimately as a journal editor by his own admission it contains all the things he wished that his mentors had told him 25 years ago but didn t the material in the book is drawn from many years of finding all these things out for himself usually by trial and error but mostly error the text adopts a much lighter touch than is normally found in books of this type after all who really wants to read a book about writing research papers the author describes his own unique approach to writing journal papers which in his own words has proved to be extremely successful all major points are illustrated with examples from his own published works the book is written in the form of a manual for constructing a journal manuscript read a chapter write a section however the material it contains goes beyond just this and also describes how to select a target journal the manuscript submission process what referees are looking for in a good journal paper and how to deal with the referees comments each chapter concludes with a checklist to ensure all the key elements have been addressed
