Understanding the Insurance Industry 2015 Edition

2015-10-21

doctoral thesis dissertation from the year 2015 in the subject business economics business management corporate
governance grade 68 50 university of pretoria gibs course mba language english abstract this study will
determine how regulation changes have affected business models in the insurance industry how customers are
treated fairly within the insurance industry and how operational efficiency is achieved despite regulation
changes within the insurance industry the south african short term insurance industry has been inundated
with many competitors attempting to obtain a space for which there is limited market share faced with an
increase of invasive legislature the entire industry is devoting a substantial amount of time in advancing this
new regulatory regime amidst the competitive onslaught and regulatory arbitrage the underwriting
management agencies uma s are continuously looking for new ways to grow their businesses against the
backdrop of a limited distribution channel and an expensive business model the study was conducted through
the use of a survey distributed to umas within local insurance companies the survey contained quantitative
questions answerable through a likert scale the questions revolved around the effect of regulations on
operational efficiency the treating customers fairly tcf initiative and business model changes in order to
accommodate regulatory changes

involved today those customers have different expectations for how they want to do business and be served
and those expectations are changing faster than ever before the industry has faced many headwinds making it
difficult to keep up with change regulation bureaucracy system constraints past technology project pain thin
margins etc and yet several carriers have innovated and evolved understanding their paths to success can help
shed light on how we as an industry can continue to evolve to meet our customers needs despite the
disruption and headwinds we all face the future of insurance shares the first hand accounts of insurers across
functions and lines of business to not just give inspiration but leave readers with a tangible blueprint for
evolving through a new set of modern flexible and responsive approaches and tools

Insuring QualityHow to Improve Quality, Compliance, Customer Service,
and Ethics in the Insurance Industry

1997-10-27

insurance is a concept a technique and an economic institution it also has an important role in the economic
social and political life of all countries this text aims to describe the significance of insurance institutions the
reasons they exist and how they function

Insurance

2012-10

important changes have buffeted the insurance industry over the past decade the 1999 repeal of key provisions
of the glass steagall act unleashed a wave of conglomeration in financial services as bank holding companies
acquired insurance and securities businesses and to a much lesser degree insurance companies acquired
securities firms and banks rivalry within the sector has intensified insurance companies have developed
products that compete directly with the offerings of banks and securities firms and vice versa in addition the
industry has become increasingly global against this backdrop pressure has been building for fundamental
changes to the structure of insurance regulation in the united states despite several court challenges over the
years insurance continues to be regulated by the states many insurance companies view state regulation as an
increasing drag on their efficiency and competitiveness and support a federal regulatory system however
powerful stakeholders including state officials state and regional insurance companies and many insurance
agents oppose federal regulation as a result proposals to establish an optional federal charter ofc for insurance
companies and agents remain mired in fierce debate the future of insurance regulation in the united states
gathers some of the country s leading experts on financial regulation to assess the case for an enhanced federal
role in the insurance sector they pay particular attention to the merits of an ofc and how it might be designed
they also consider the principles that should guide insurance regulatory policies regardless of the institutional
framework and examine the implications of financial convergence and the internationalization of insurance
markets for an optimal regulatory structure the debate over insurance regulation has only grown in
complexity and intensity since the financial crisis began in the fall of 2008 this book will both inform and help
to shape those critical discussions contributors john a cooke international financial services london robert

2006

this book explores three aspects of the health insurance market for small firms the economic underpinnings of purchasing difficulties and policy implications the politics of change and health plan choice behaviour

The Future of Insurance

2020-06-23

abstract insurance market activity both as a financial intermediary and a provider of risk transfer and indemnification may contribute to economic growth by allowing different risks to be managed more efficiently and by mobilizing domestic savings during the past decade there has been faster growth in insurance market activity particularly in emerging markets given the process of liberalization and financial integration which raises questions about its impact on economic growth the author tests whether there is a causal relationship between insurance market activity life and nonlife insurance and economic growth using the generalized method of moments for dynamic models of panel data for 56 countries and for the 1976 2004 period he finds robust evidence of a causal relationship between insurance market activity and economic growth both life and nonlife insurance have a positive and significant causal effect on economic growth high income countries drive the results in the case of life insurance on the other hand both high income and developing countries drive the results in the case of nonlife insurance
