Critical Approaches to Education Policy Analysis 2016-11-18 this handbook enables your organization to systemize the tedious ongoing and mandatory process of credentialing your medical staff and to understand why you must healthcare organizations must have credentialed medical staffs to deliver their services the reasons are two fold first educated licensed experienced and proven caregivers ensure that a hospital or medical practice is capable of delivering quality care secondly

payers require that the physicians and other licensed healthcare professionals are qualified and licensed to work with their patients before receiving payment for services the provider must have specific credentials for providing that service verifying and documenting the credentials of a healthcare provider is tedious ongoing and mandatory an organization with a large medical staff may struggle with keeping the credentialing function current as many licenses have rolling expirations credentialing ensures that clinical practitioners are duly qualified licensed and board certified it reports the history of malpractice claims state instituted sanctions or other undesirable professional circumstances of providers credentialing and privileging of healthcare professionals protects patients and hospitals by minimizing the risk of medical errors that may result from the work of incompetent providers it also undergirds the reputation and credibility of the institution in the eyes of providers and across the healthcare community further credentialing with insurers forms the basis for reimbursement for professional services without the acceptance of the professional credentials of a provider insurers and other third party payers will not compensate his or her claims the purpose of this book is to explain the necessity and to provide the process for the official documentation of each practitioner the information presented in these chapters will serve as a practical resource for strengthening your organization s credentialing function book features outlines the necessity for credentialing in the delivery of care and in attaining reimbursements for services provided explores options for in house and outsourced credentialing function provides systematic process for ongoing credentialing operations
