rain is elemental mysterious precious destructive it is the subject of countless poems and paintings the top of the weather report the source of the world s water yet this is the first book to tell the story of rain cynthia barnett s rain begins four billion years ago with the torrents that filled the oceans and builds to the storms of climate change it weaves together science

the true shape of a raindrop the mysteries of frog and fish rains with the human story of our ambition to control rain from ancient rain dances to the 2 203 miles of levees that attempt to straitjacket the mississippi river it offers a glimpse of our founding forecaster thomas jefferson who measured every drizzle long before modern meteorology two centuries later rainy skies would help inspire morrissey s mopes and kurt cobain s grunge rain is also a travelogue taking readers to scotland to tell the surprising story of the mackintosh raincoat and to india where villagers extract the scent of rain from the monsoon drenched earth and turn it into perfume now after thousands of years spent praying for rain or worshiping it burning witches at the stake to stop rain or sacrificing small children to bring it mocking rain with irrigated agriculture and cities built in floodplains even trying to blast rain out of the sky with mortars meant for war humanity has finally managed to change the rain only not in ways we intended as climate change upends rainfall patterns and unleashes increasingly severe storms and drought barnett shows rain to be a unifying force in a fractured world too much and not nearly enough rain is a conversation we share and this is a book for everyone who has ever experienced it
