drawing from the unique context and climate of the himalaya this book highlights several innovative design interventions shaped by a myriad of social cultural environmental and political factors that have been employed in villages to combat climate change climate adaptive design in high mountain villages focuses on ladakh an outpost on the front lines of climate change and the region s creative responses to the pressing issues of food security water management energy efficiency design aid and material resources in the anthropocene these strategies from artificial glaciers to tree armor showcase the breadth of creative solutions already underway in doing so the research addresses the broader concept of climate adaptive design and how it informs the disciplines of architecture landscape architecture and urban

planning an ideal read for academics researchers and students in these fields this book presents a focused investigation into climate adaptive strategies that could provide transferable solutions for the rest of the world

through an examination of transport planning in australia this book challenges conventional wisdom by showing through original research how car dependence is as much an institutional as a technical phenomenon the authors case studies in three metropolitan cities show how transport policy has become institutionally fixated on a path dominated by private road based transport and how policy systems become encrusted around investment to accommodate private cars erecting an impenetrable barrier against more sustainable mobility and accessibility solutions the findings are applicable to most cities of the developed world and to fields beyond transport planning

inappropriate health care is an escalating and expensive problem it affects high income middle income and low income countries and wastes billions of dollars annually as well as harming individuals and communities inappropriate care refers to both the overuse and underuse of tests and treatments and ironically can occur concurrently within the same health system even though patient centred care is still the prevailing ethos specifying where patients should be situated geographically has not required health professionals to consider the preferences values and priorities of patients when making treatment decisions patient perspective care demands that the decisions health professionals make are in the service of patient s goals health care ultimately is helping individuals to live the lives they would wish for themselves in order to meet this imperative health professionals must work towards understanding what their patients would like to achieve through their engagement with health services this book details the extent and scope of inappropriate care and how we have arrived in this position the necessity for patient perspective care is outlined and provides a theoretical framework that explains why patient perspective care is so critical the implications of this theory are then explored and specific strategies for moving towards a patient perspective approach are discussed this book is entirely original and describes a novel fresh approach to delivering health services many long standing and expensive problems such as missed appointments will disappear and patients will be more satisfied with the treatments they receive health services generally will be more efficient and effective leading to more sustainable and affordable health care

analytics and artificial intelligence ai what are they good for the bandwagon keeps answering absolutely everything analytics and artificial intelligence have captured the attention of everyone from top executives to the person in the street while these disciplines have a relatively long history within the last ten or so years they have exploded into corporate business and public consciousness organizations have rushed to embrace data driven decision making companies everywhere are turning out products boasting that artificial intelligence is included we are indeed living in exciting times the question we need to ask is do we really know how to get business value from these exciting tools unfortunately both the analytics and ai communities have not done a great job in collaborating and communicating with each other to build the necessary synergies this book bridges the gap between these two critical fields the book begins by explaining the commonalities and differences in the fields of data science artificial intelligence and autonomy by giving a historical perspective for each of these fields followed by exploration of common technologies and current

trends in each field the book also readers introduces to applications of deep learning in industry with an overview of deep learning and its key architectures as well as a survey and discussion of the main applications of deep learning the book also presents case studies to illustrate applications of ai and analytics these include a case study from the healthcare industry and an investigation of a digital transformation enabled by ai and analytics transforming a product oriented company into one delivering solutions and services the book concludes with a proposed ai informed data analytics life cycle to be applied to unstructured data

indoles continue to be of great interest to the pharmaceutical industry and at the current time several thousand specific new derivatives are reported annually research has been driven by the wide range of indole derivatives which occur in nature and through the biological activity of many indole derivatives of both natural and synthetic origin this book provides a systematic guide to the most useful and important reactions in the field for both synthesis and synthetic modification of the indole ring while

including the most recently developed and promising methods it also updates information available on classical methods to give the reader an up to date and comprehensive view of the subject the methods are illustrated by procedures drawn from the literature and by tables including examples chosen to indicate both the scope of applicability and variations in methodology the organization of the book is based on the retrosynthetic concept of identifying the bonds formed in the reaction which in turn identifies potential starting materials includes systematic summaries of the most important methods for the construction of indoles from aromatic precursors discusses methods for preparing indoles by annelation of pyrroles covers methods for adding or modifying substituent groups including methods for introducing the tryptamine and tryptophan side chainsexamines reduction oxidation reactions that are specific for indoles considers use of cycloaddition reactions for synthetic elaboration of indoles

children are already learning at birth and they develop and learn at a rapid pace in their early years this provides a critical foundation for lifelong progress and the adults who provide for the care and the education of young children bear a great responsibility for their health development and learning despite the fact that they share the same objective to nurture young children and secure their future success the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well transforming the workforce for children birth through age 8 explores the science of child development particularly looking at implications for the professionals who work with children this report examines the current capacities and practices of the workforce the settings in which they work the policies and infrastructure that set qualifications and provide professional learning and the government agencies and other funders who support and oversee these systems this book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals these detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning shared knowledge and competencies for care and education professionals and principles for effective professional learning young children thrive and learn best when they have secure positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress transforming the workforce for children birth through age 8 offers guidance on system changes to improve the quality of professional practice specific actions to improve professional learning systems and workforce development and research to continue to build the knowledge base in ways that will directly advance and inform future actions the recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive and ultimately improve outcomes for children
